Cleaning the Basket and Tray

After cooking, the basket and tray usually contain food residue and grease. The manual recommends removing these parts carefully and washing them with warm, soapy water. Avoid abrasive cleaners or metal utensils that could scratch the non-stick surfaces.

- **Shake or Turn Food Midway:** For foods like fries or nuggets, shaking the basket halfway through the cooking cycle promotes uniform browning.

Common Troubleshooting Advice in the CJ Tech Air Fryer Manual

Like any appliance, your CJ Tech air fryer may occasionally encounter issues. The manual is a valuable resource for quick troubleshooting.

Air Fryer Not Turning On

If the appliance doesn't power up, the manual suggests checking the power connection and ensuring the basket is properly inserted. Most models have safety switches that prevent operation if the basket isn't securely in place.

Uneven Cooking

If food isn't cooking evenly, the manual recommends shaking or turning the food midway through the process and ensuring the basket isn't overcrowded.

Unusual Odors or Smoke

New air fryers may emit a slight odor during the first few uses due to manufacturing residues, which the manual explains is normal and should dissipate quickly. However, persistent smoke could indicate grease buildup, so regular cleaning as advised is essential.

Having an online manual is particularly advantageous for users who may have misplaced the original booklet or who are seeking quick reference while cooking. The digital format often includes searchable text, enhancing convenience.

Potential Areas for Improvement

While the cj tech air fryer manual is generally well-regarded, there are opportunities for enhancement.
