political science major ucla: Orange County Jew: a Memoir Martin Aaron Brower, 2010-03-16 When Martin Brower moved his family from heavily Jewish Los Angeles to barely Jewish Orange County, California, in 1974, his Los Angeles friends were amazed at his bravery and his foolishness. Orange County was considered anti-Semitic and lacking in culture. However, during the years following World War II, Orange County was transformed from a small rural community with citrus groves, row crops and cattle -- first into a bedroom community for neighboring Los Angeles County and then into a dynamic urban empire. As the Countys population and employment base exploded, Orange Countys Jewish population grew from a small enclave of Jewish shopkeepers into a vibrant Jewish community in excess of 100,000. To the surprise of many, Orange County now boasts one of the leading centers of Jewish life in the nation, complete with 30 synagogues, a grand new Jewish Community Center, one of the nations largest Jewish day schools and one of its finest homes for the aging. In his book Orange County Jew: A Memoir, Brower superimposes the growth of the Jewish community over the amazing development of Orange County itself, and uses as a framework the personal story of his own 36 years as a resident of Orange County and as a player among its major real estate development companies and its entrepreneurial leaders.

political science major ucla: From the Bayou to the Bay Robert C. Smith, 2021-01-01 In this refreshingly candid intellectual autobiography, Robert C. Smith traces the evolution of his consciousness and identity from his early days in rural Louisiana to his emergence as one of the nation's leading scholars of African American politics. He interweaves this personal narrative with the significant events and cultural flashpoints of the last half of the twentieth century, including the Watts Rebellion, the rise of the Black Power movement, the tumultuous protests at Berkeley, and the sex and drug revolutions of the 1960s. As a graduate student he experiences the founding of Black Studies, the grounding in blackness at Howard University, and, as a professor, the swirling controversies and contradictions of Black Studies and feminism at San Francisco State University. Smith also locates his story in the context of the scholarly literature on African American politics, imbuing it with his own personal perspective. His account illuminates the past but, at the same time, looks toward the future of the long struggle by African American scholars to use knowledge as a base of power in the fight against racism and white supremacy.
