**us history timeline printable: Nature Unbound** Randy T Simmons, Ryan M. Yonk, Kenneth J. Sim, 2016-03-01 What if what we think we know about ecology and environmental policy is just wrong? What if environmental laws often make things worse? What if the very idea of nature has been hijacked by politics? What if wilderness is something we create in our minds, as opposed to being an actual description of nature? In 1934, former U.S. Forest Service official Aldo Leopold, a godfather to the modern environmental movement, wrote that "restrictive laws" had "largely failed" in their mission to conserve America's forests, rivers, and other natural resources. Less than forty years later, however, as various events pushed environmental concerns into the public spotlight, lawmakers from both parties championed legislation far more sweeping and restrictive than any Leopold had witnessed. How well did these "restrictive laws" work to right environmental wrongs? Why did so many miss the mark? And how should we go about improving our policies? In *Nature Unbound*, authors Randy Simmons, Ryan M. Yonk, and Kenneth J. Sim offer a devastating critique of federal environmental policy by scrutinizing it through the lenses of biological ecology and political ecology. This powerful framework, they show, reveals that environmental policy has been guided since the late 1960s by demonstrably false assumptions responsible for a host of ineffective or wasteful, command-and-control policies—on air pollution, water pollution, endangered species, wilderness, renewable energy, and more. The mistakes have also empowered political entrepreneurship in ways that have encroached on property rights, burdened the general public, and degraded the civic landscape. More than a critique of false assumptions and flawed policies, *Nature Unbound* offers bold principles to help us rethink environmental objectives, align incentives with goals, and affirm the notion that human beings are an integral part of the natural order and merit no less consideration than Earth's other treasures. Ultimately, nothing less can succeed in our efforts to restore natural resources and revitalize our social and political ecosystem.

**us history timeline printable: The Trauma of Racism** Alisha Moreland-Capua, 2021-05-31

This book provides in-depth analysis of the historical, philosophical, anthropological, political and neurobiological reinforcements of fear and the role of fear-on-fear interactions in the construction and maintenance of systems. This text will help systems appreciate the profound, pervasive and deleterious role fear has played in the establishment of laws, policies and practices, and explore what systems can do to reduce fear and prioritize safety and healing. Right now we are dealing with hard truths: human suffering runs deep and is universal; trauma is ubiquitous and widespread; racism is real and has profound psychological, physical, political, social and economic implications; and the world is hurting and needs healing. Many are curious about where and when healing will commence, who will facilitate it and what it will look and feel like. Healing comes in this order: safety, truth and then reconciliation. When we know better, we can (or should) certainly do better. This book offers a framework for how to effectively begin to deconstruct systemic fear, prioritize safety, reduce needless suffering and move toward optimal healing and sustained change.
