your introduction to education explorations in teaching 4th edition: Inspiring Science in the Early Years: Exploring Good Practice Lois Kelly, Di Stead, 2015-02-16 This book explores the science inherent in good early years practice and provides a rich range of ideas to inspire you to 'have a go' in your setting. It provides a balance between theory which underpins good practice and plenty of ideas of how you might put the theory into practice. With a focus on how children learn about the world they live in and activities intended to develop scientific understanding the book offers an holistic approach, with key topics including: How children construct scientific meaning Tuning into children's initial scientific understanding How play supports the development of children's science ideas Providing a rich environment for learning early years science Developing children's scientific experiences This handy guide is ideal to support you if you are studying on an early years course, or if you are an established early years professional who wishes to enrich early scientific learning in your setting. Lois Kelly and Di Stead are Education Consultants specializing in primary science. This clearly written and engaging book examines Science in the Early Years through a variety of activities, including role-play, toys and technology. The vital importance of sensory experiences and language is emphasized throughout. The wide experience and knowledge of the authors guarantees a highly enjoyable read. The links to all curricula in the UK are extremely beneficial and I particularly liked the way that photographs and Key Points text boxes have been used throughout the book. The breadth and depth of writing about science makes this a highly desirable book for any practitioner working or studying in the Early Years. Kathy Brodie, Independent Early Years Consultant As an Early Years consultant who is passionate about children's thinking, exploring, questioning, investigating and most of all engaging...I really enjoyed this book. I especially liked it because it provokes practitioners to think about 'science' as the discovery and exploration of the world around us and not just as a National Curriculum subject. The mix of

authors, their writing styles and the content of each chapter makes it a really easy and engaging read. Definitely one to add to your reading list if you work with children in the Early Years. Alistair Bryce-Clegg, Early Years Consultant As the title suggests, this book from the first page onwards inspires the reader to learn more about how to develop, enhance and incorporate effective practice in science in the early years. In addition to developing an understanding of how to approach the teaching of science, it gives a clearly articulated and accessible theoretical insight into how young children learn. To compliment this there are points of reflection, case studies, practical tasks and examples from the field. This is a valuable book for both students and practitioners alike as it goes beyond just giving suggestions for what to do; it explains the why and the how as well. Joanne McNulty, Manchester Metropolitan University This is a warm, accessible book, strongly grounded in research. It interweaves real life examples of science in the early years with underlying pedagogic principles and inspires new possibilities. The enthusiasm of the authors is contagious! your introduction to education explorations in teaching 4th edition: *Teaching Introduction to Women's Studies* Carolyn DiPalma, Barbara S. Winkler, 1999-10-30 This edited collection addresses the institutional context and social issues in which teaching the women's studies introductory course is embedded and provides readers with practical classroom strategies to meet the challenges raised. The collection serves as a resource and preparatory text for all teachers of the course including experienced teachers, less experienced teachers, new faculty, and graduate student teaching assistants. The collection will also be of interest to educational scholars of feminist and progressive pedagogies and all teachers interested in innovative practices. The contributors discuss the larger political context in which the course has become a central representative of women's studies to a growing, although less feminist-identified, population. Increased enrollments and changes in student population are noted as a result, in part, of the popularity of Introduction to Women's Studies courses in fulfilling GED and diversity requirements. New forms of student resistance in a climate of backlash and changes in course content in response to internal and external challenges are also discussed. Evidence is provided for an emerging paradigm in the conceptualization of the introductory course as a result of challenges to racism, heterosexism, and classism in women's studies voiced by women of color and others in the 1980s and 1990s. Sensationalist charges that women's studies teachers, including those who teach the Introduction to Women's Studies course, are the academic shock troops of a monolithic feminism are challenged and refuted by the collection's contributors who share their struggles to make possible classrooms in which informed dialogue and disagreement are valued.

your introduction to education explorations in teaching 4th edition: *Schools as Community Hubs* Benjamin Cleveland, Sarah Backhouse, Philippa Chandler, Ian McShane, Janet M. Clinton, Clare Newton, 2023-04-19 This open access book brings together research on the planning, design, governance and management of schools as community hubs—places that support the development of better-connected, more highly integrated, and more resilient communities with education at the centre. It explores opportunities and difficulties associated with bringing schools and communities closer together, with a focus on the facilities needed to accommodate shared

experiences that generate social capital and deliver reciprocal benefits. This book discusses the expanded roles of schools, and investigates how schools may offer more to their communities—historically, currently and into the future—with respect to the role of the built environment in situating community activities and services. Organised around four sections, it showcases important areas of development in the field via an interdisciplinary approach, which weaves together empirical research with theoretical insights and practical examples. This book not only highlights the challenges associated with the development of schools as community hubs but offers evidence-based insights into how to overcome such hurdles to develop community-facing schools into the future.
