Halberstam theorizes the wild as an unbounded and unpredictable space that offers sources of opposition to modernity's orderly impulses. Wildness illuminates the normative taxonomies of sexuality against which radical queer practice and politics operate. Throughout, Halberstam engages with a wide variety of texts, practices, and cultural imaginaries—from zombies, falconry, and M. NourbeSe Philip's *Zong!* to Maurice Sendak's *Where the Wild Things Are* and the career of Irish anticolonial revolutionary Roger Casement—to demonstrate how wildness provides the means to know and to be in ways that transgress Euro-American notions of the modern liberal subject. With *Wild Things*, Halberstam opens new possibilities for queer theory and for wild thinking more broadly.

where the wild things are quotes: The Opera of the Twentieth Century William Schoell, 2015-01-24 In the late 1500s in Florence, aristocrats of the Renaissance renovated classical Greek dramas into dramatic musicals and gave birth to the first operas. After centuries of transformation, the opera is still appreciated as a historically dynamic paradigm of the fine arts. Composers of the twentieth century have worked hard to fashion a voice distinct from the romantic composers of the nineteenth century and the traditions that preceded them, and this volume explores the extent of their success. Beginning with a thorough introduction to the history of operatic forms and transformation, this book presents a comprehensive discussion of twentieth century opera. Giving ear to many composers and many styles--romantic and modern and assorted variations--the discussion includes such globally renowned composers as Strauss, Puccini, Prokofiev and Mascagni, as well as the esoteric works of less famous composers. Spanning as it does from Puccini's *Tosca* and Charpentier's *Louise* to Heggie's *Dead Man Walking* and Corigliano's *The Ghosts of Versailles*, twentieth century operatic form has something for every taste. The discussion is therefore structured chronologically and directed at exploring this complex diversity and ingenuity of twentieth-century styles. Examples from across the globe and firsthand commentary from contemporary operatic professionals complement the discussion. Concluding chapters comment upon the operatic presence in the twenty-first century and the future of operatic forms.

Harste, 2013-03-05 How can teacher educators engage pre-service and in-service teachers in learning about and framing their teaching from a critical literacy perspective? What does this mean? Why is it important? To address these questions, this book offers a theoretical framework and detailed examples, pedagogical resources, and insights into ways to build critical literacies with teachers in and out of school. Its unique contribution is to bridge critical literacy theory and teacher education. Participants in teacher education programs and professional development settings are often reminded of the need to build curriculum using children's inquiry questions, passions and interests but generally this message is delivered only through telling (lectures) or showing (examples from other people's classrooms). This book advances critical literacy by explaining and illustrating how teacher educators can do much more—by creating opportunities for pre-service and in-service teachers to live critical literacies through experiencing firsthand what it is like to be a learner where the curriculum is built around teachers' own inquiry questions, passions, and interests.

where the wild things are quotes: *They Suck, They Bite, They Eat, They Kill* Joni Richards Bodart, 2012 Teen readers have always been fascinated by monsters, but lately it seems like every other young adult (YA) book is about vampires, zombies, or werewolves. These works are controversial, since they look at aspects of life and human nature that adults prefer to keep hidden from teenagers. But this is also why they are so important: They provide a literal example of how ignoring life's hazards won't make them go away and demonstrate that ignorance of danger puts one at greater risk. In *They Suck, They Bite, They Eat, They Kill: The Psychological Meaning of Supernatural Monsters in Young Adult Fiction* Joni Bodart examines six different monsters—vampires, shapeshifters, zombies, unicorns, angels, and demons—in YA literature. Bodart first discusses the meaning of these monsters in cultures all over the world. Subsequent chapters explore their history and most important incarnations, comparing the same kind of creatures featured in different titles. This volume also contains interviews with authors who provide additional insight and information, and the bibliography includes a comprehensive list of titles featuring the various monsters. Analyzing the most important and well-written series and titles for teens, *They Suck, They Bite, They Eat, They Kill* will be useful for parents, teachers, and anyone else hoping to understand why teens want to read books in this genre and what some of the benefits of reading them might be.

where the wild things are quotes: *The Unexpected Joy of the Ordinary* Catherine Gray, 2019-12-26 **FROM THE SUNDAY TIMES BESTSELLING AUTHOR** 'Life-affirming' - THE TELEGRAPH 'Wonderful' - INDEPENDENT 'She made it her mission to learn how to be default happy rather than default disgruntled' - RADIO 4 - WOMAN'S HOUR 'Take a leaf out of Gray's book and be kinder to yourself by appreciating life just as it is' - IRISH TIMES 'This book came to me in an hour of need - during lockdown when I had to focus on the positive, appreciate simple things, not lose my shit, and value each day. It was a pure joy for me and held my hand' - SADIE FROST 'Interesting and joyful. Lights a path that could help us to build resilience against society's urging to compare life milestones with peers' - LANCET PSYCHIATRY Underwhelmed by your ordinary existence? Disillusioned with your middlin' wage, average body, 'bijou' living situation and imperfect loved ones? Welcome to the club. There are billions of us. The 'default disenchanted'. But, it's not us being brats. Two deeply inconvenient psychological phenomena conspire against our satisfaction. We have negatively-biased brains, which zoom like doom-drones in on what's wrong with our day, rather than what's right. (Back in the mists of time, this negative bias saved our skins, but now it just makes us anxious). Also, something called the 'hedonic treadmill' means we eternally quest for better, faster, more, like someone stuck on a dystopian, never-ending treadmill. Thankfully, there are scientifically-proven ways in which we can train our brains to be more positive-seeking. And to take a rest from this tireless pursuit. Whew. Catherine Gray knits together illuminating science and hilarious storytelling, unveiling captivating research showing that big bucks don't mean big happiness, extraordinary experiences have a 'comedown' and budget weddings predict a lower chance of divorce. She reminds us what an average body actually is, reveals that exercising for weight loss means we do less exercise, and explores the modern tendency to not just try to keep up with the Murphys, but keep up with the Mega-Murphies (see: the social media elite). Come on in to this soulful and life-affirming read, to discover why an ordinary life may well be the most satisfying one of all.

The book approaches CYA literature from various complementary angles: Historical: the influence of religious and philosophical convictions on its development; Thematic: commonly-occurring genres and types of CYA literature, such as realism versus speculative fiction; Narratological: plot, time, tension, character, and setting; Visual: the main principles for 'reading' images in picturebooks, graphic novels, and comics; Ideological: power dynamics and common constructions of childhood; Social: questions of identity politics related to race, gender, and orientation, and offers tools to read critically. Engagements with Children's and Young Adult Literature brings together established theories and new perspectives on CYA literature, combining engagement with theory with hands-on analytical, interpretive, and methodological tools for budding scholars of CYA literature. Taking off her white coat—becoming a patient herself—she confronts unimaginable fears, copes with her limitations, and sidesteps her skepticism of alternative medicine to seek help from unlikely sources. Drawing on riveting patient stories, Doggett reveals the dark realities of the dysfunctional U.S. healthcare system, made all the more stark when she becomes the one seeking care. MS pushes Doggett—a perfectionist at heart—to soften her inner drill sergeant and embrace self-compassion. As a patient, she learns to advocate for herself to ensure on-time medication deliveries and satisfactory treatment plans; to navigate chronic dizziness, relapses, and parenting frustrations; and to push her physical limits as a runner to go farther than ever before. As the director of a health clinic for the uninsured, Doggett's MS inspires an even deeper empathy as she confronts challenging cases, prompting her to work harder on behalf of those in her care, many of whom struggle with illnesses more serious than her own. This hopeful and uplifting book will encourage those living with chronic disease, and those supporting them, to power forward with courage and grace. It will spark conversations to redefine perfect parenting and

trigger uncomfortable discussions and outrage about the vicious inequalities of health care in the U.S. Most of all, it will inspire readers to embrace the gifts of an imperfect life and look for silver linings, despite life's detours that sabotage plans and take them off their expected paths.

where the wild things are quotes: *Displaying Death and Animating Life* Jane C. Desmond, 2016-08-18 The number of ways in which humans interact with animals is almost incalculable. From beloved household pets to the steak on our dinner tables, the fur in our closets to the Babar books on our shelves, taxidermy exhibits to local zoos, humans have complex, deep, and dependent relationships with the animals in our ecosystems. In *Displaying Death and Animating Life*, Jane C. Desmond puts those human-animal relationships under a multidisciplinary lens, focusing on the less obvious, and revealing the individualities and subjectivities of the real animals in our everyday lives. Desmond, a pioneer in the field of animal studies, builds the book on a number of case studies. She conducts research on-site at major museums, taxidermy conventions, pet cemeteries, and even at a professional conference for writers of obituaries. She goes behind the scenes at zoos, wildlife clinics, and meetings of pet cemetery professionals. We journey with her as she meets Kanzi, the bonobo artist, and a host of other animal-artists—all of whom are preparing their artwork for auction. Throughout, Desmond moves from a consideration of the visual display of unindividuated animals, to mourning for known animals, and finally to the marketing of artwork by individual animals. The first book in the new Animal Lives series, *Displaying Death and Animating Life* is a landmark study, bridging disciplines and reaching across divisions from the humanities and social sciences to chart new territories of investigation.
