**anne heche drug history: Queering the Museum** Nikki Sullivan, Craig Middleton, 2019-11-01 Queering the Museum develops a queer analysis of the ways in which museums construct themselves, their core business, and their publics through the, often unconscious, use of inherited ways of knowing and doing. Providing a critique of both the practices and conventions associated with the modern public museum, and the ontological assumptions that inform them, the authors consider recent discourse around inclusion in museums and explore the ways this has been taken up in practice. Highlighting the limits of particular approaches to inclusion, and the failure to move away from a traditional museological paradigm, the book outlines an alternative critical

museological approach that the authors refer to as 'queer'. Providing readers with the critical tools necessary for a profound rethinking of museum practice, the book also responds to and problematises the growing call for social inclusion. Queering the Museum will appeal to academics, students, and museum and arts sector practitioners with an interest in critical theory or queer practice. It will be of particular interest to those working in the fields of museum studies, sociology, archaeology, anthropology, cultural studies, media, social policy, politics, philosophy, and history.

**anne heche drug history: Latino Images in Film** Charles Ramírez Berg, 2009-09-15 The bandido, the harlot, the male buffoon, the female clown, the Latin lover, and the dark lady—these have been the defining, and demeaning, images of Latinos in U.S. cinema for more than a century. In this book, Charles Ramírez Berg develops an innovative theory of stereotyping that accounts for the persistence of such images in U.S. popular culture. He also explores how Latino actors and filmmakers have actively subverted and resisted such stereotyping. In the first part of the book, Berg sets forth his theory of stereotyping, defines the classic stereotypes, and investigates how actors such as Raúl Julia, Rosie Pérez, José Ferrer, Lupe Vélez, and Gilbert Roland have subverted stereotypical roles. In the second part, he analyzes Hollywood's portrayal of Latinos in three genres: social problem films, John Ford westerns, and science fiction films. In the concluding section, Berg looks at Latino self-representation and anti-stereotyping in Mexican American border documentaries and in the feature films of Robert Rodríguez. He also presents an exclusive interview in which Rodríguez talks about his entire career, from *Bedhead* to *Spy Kids*, and comments on the role of a Latino filmmaker in Hollywood and how he tries to subvert the system.
