bunni how we first met: Solomon Time Will Randall, 2007-11-01 Who hasn't fantasized about dismantling his or her hassled, wired-up life for a simpler existence? Yet who among us has the will and opportunity to do it? The answer, of course, is very few. Will Randall, a young English schoolmaster, had such a chance -- and took it. He uprooted his conventional First World life and let himself be blown to one of the farthest and most beautiful corners of the earth, the Solomon Islands of the South Pacific. In the entertaining tradition of Bill Bryson's In a Sunburned Country, this is the story of Solomon Time. From the first, it's an improbable journey. In a chance encounter on a rugby field, Randall meets a doddering old man known as the Commander, who has retired to England after running a cocoa plantation in the South Pacific for thirty years. Six months later, the Commander dies and his will is read: he wants someone to travel to his beloved, long-missed island -- where his plantation has fallen into ruin -- and devise a way for the natives to support themselves. If successful, they might avoid poverty, build a new school, and even fend off the greedy developers circling their peaceful waters. It's a mission of noblesse oblige, yet possibly a fool's errand, too. Randall agrees to go. Spread across the Tropic of Capricorn, the Solomon Islands are not so much the Pacific archipelago that time forgot as the one that forgets time. Randall's new home is Mendali, a fishing village so remote it can be reached only by motorized canoe. But the people of the village, some with cheeks engraved with a rising sun, are welcoming, for they remember the Commander kindly, and still practice a pagan Anglicanism in a church he built for them in 1956. They sleep in houses made of leaves and live on fish of every sort, mud crabs, yams, ngali nuts, even the honeycomb of termites. Randall decides that the villagers could raise chickens, and they greet the idea with enthusiasm. But finding live chicken eggs in their watery world proves wildly difficult, and

Randall must chase after the eggs over shark-infested seas and through jungles where strange characters reside, including a one-eyed dwarf and a tattooed lady. One couldn't imagine a better man than Will Randall to help the people of Mendali meet the twenty-first century on their own terms. But will he succeed? *Solomon Time* is a moving and witty account of one man's accidental adventure in paradise and is certain to enchant explorers and armchair travelers alike.

bunni how we first met: In the Lion's Den Andrew Tabler, 2011 A key player in the Middle East and the site of violent protests in 2011, Syria has long been a thorn in Washington's side when it comes to forging peace or rolling back the influence of the Islamic republic of Iran. But only after the events of 9/11 and Damascus's staunch opposition to the war in Iraq did the U.S. government begin an unannounced campaign to pressure President Bashar al-Assad's regime to revamp its regional and domestic policies. The book vividly captures Tabler's behind-the-scenes experiences and provides a firsthand look at 21st-century Syria and Washington's attempts to craft a New Middle East. Examining the effects of the neoconservatives' strategy and asking what went wrong and how Washington can achieve a new relationship with this pivotal Middle Eastern nation, this investigation provides a rare glimpse into U.S. foreign policy in the Middle East.

bunni how we first met: The Syrian Uprising Raymond Hinnebusch, Omar Imady, 2018-02-02 Most observers did not expect the Arab spring to spread to Syria, for a number of seemingly good reasons. Yet, with amazing rapidity, massive and unprecedented anti-regime mobilization took place, which put the regime very much on the defensive; what began as the Syrian Uprising in March 2011 has evolved into one of the world's most damaging and protracted conflicts. Despite over six years having passed since the inception of the Syrian Uprising, this phenomenon remains difficult to fully grasp, both in terms of underlying forces and long-term implications. This book presents a snapshot of how the Uprising developed in roughly the first two to three years (2011-2013) and addresses key questions regarding the domestic origins of the Uprising and its early trajectory. Firstly, what were the causes of the conflict, both in terms of structure (contradictions and crisis within the pre-Uprising order) and agency (choices of the actors)? Why did the Uprising not lead to democratization and instead descend into violent civil war with a sectarian dimension? With all 19 chapters addressing an aspect of the Uprising, the book focuses on internal dynamics, whilst a subsequent volume will look at the international dimension of the Uprising. Taking an innovative and interdisciplinary approach that seeks to capture the full complexity of the phenomenon, this book contributes significantly to our understanding of the Syrian conflict, and will therefore be a valuable resource for anyone studying Middle Eastern Politics.
