Martin, Jr., 2024-04-02 Since slavery, African and African American humor has baffled, intrigued, angered, and entertained the masses. *Rolling* centers Blackness in comedy, especially on television, and observing that it is often relegated to biopics, slave narratives, and the comedic. But like W. E. B. DuBois's ideas about double consciousness and Racquel Gates's extension of his theories, we know that Blackness resonates for Black viewers in ways often entirely different than for white viewers. Contributors to this volume cover a range of cases representing African American humor across film, television, digital media, and stand-up as Black comic personas try to work within, outside, and around culture, tilling for content. Essays engage with the complex industrial interplay of Blackness, white audiences, and comedy; satire and humor on media platforms; and the production of Blackness within comedy through personal stories and interviews of Black production crew and writers for television comedy. *Rolling* illuminates the inner workings of Blackness and comedy in media discourse.

This collection takes as its focus "Bust Culture," a concept that refers to post-crash popular culture, specifically the kind mass produced by multinational corporations in the age of media conglomeration, which is inflected by diminishment, influenced by scarcity, and infused with anxiety. The multidisciplinary contributors collected here examine mass culture not typically included in discussions of the financial meltdown, from disaster films to reality TV hoarders, the horror genre to reactionary representations of women, Christian right radio to Batman, television characters of color to graphic novels and literary fiction. The collected essays treat our busted culture as a seismograph that registers the traumas of collapse, and locate their pop artifacts along a spectrum of ideological fantasies, social erasures, and profound fears inspired by the Great Recession. What they discover from these unlikely indicators of the recession is a mix of regressive, progressive, and bemused texts in need of critical translation.

jaden smith political and economic: *Lights, Camera, Feminism?* Prof. Samantha Majic, 2023-05-16 Celebrities in the United States have drawn significant attention and resources to the complex issue of human trafficking—a subject of feminist concern—and they are often criticized for promoting sensationalized and simplistic understandings of the issue. In this comprehensive analysis of celebrities' anti-trafficking activism, however, Samantha Majic finds that this phenomenon is

more nuanced: even as some celebrities promote regressive issue narratives and carceral solutions, others use their platforms to elevate more diverse representations of human trafficking and feminist analyses of gender inequality. *Lights, Camera, Feminism?* thus argues that we should understand celebrities as multilevel political actors whose activism is shaped and mediated by a range of personal and contextual factors, with implications for feminist and democratic politics more broadly.

Climate policies, including international cooperation, spur both specific and overall innovation, with regulations, emissions-trading systems, and expenditure measures such as R&D subsidies and feed-in tariffs being particularly impactful. In turn, low-carbon innovation raises economic activity as much as other types of innovation and past technological revolutions. However, the mechanisms are different: low-carbon innovation increases capital accumulation, while other types of innovation increase total factor productivity (TFP).

jaden smith political and economic: Base Colonies in the Western Hemisphere, 1940-1967 S. High, 2009-02-13 This book examines the consequences of the famous Anglo-American destroyers-for-bases deal of September 1940, which saw fifty aged US destroyers exchanged for extensive army and navy base sites in Trinidad, Bermuda and Newfoundland as well as smaller sites in British Guiana (Guyana), Antigua, St. Lucia, Jamaica and the Bahamas. In his message to Congress, President Franklin D. Roosevelt declared that the deal was the “most important action in the reinforcement of our national defense that has been taken since the Louisiana Purchase.” While

the comparison seems an unlikely one today, as the 99 year leased bases did not play a prominent role in the subsequent fighting, few Americans would have disagreed with Roosevelt's comparison in September 1940. While the diplomatic importance of the destroyers for bases deal has been widely acknowledged, few have examined the social impact of these "friendly invasions" on the base colonies themselves. The bases brought economic prosperity and social dislocation, raising nettlesome questions. Would the US impose Jim Crow as it had in the Panama Canal Zone? Were US servicemen subject to local law outside the leased areas? What were the effects of the US bases and how did they compare? Based on extensive archival research in the United States, Great Britain, Trinidad, Bermuda and Canada, *Base Colonies in the Western Hemisphere* is the first study to answer these and other questions within a cross-regional comparative framework. The result is a fascinating exploration into race, class and empire.

jaden smith political and economic: *The Planning Moment* Sarah Blacker, Emily Brownell, Anindita Nag, Martina Schlünder, Sarah Van Beurden, 2024-05-07 Empires and their aftermaths were massive planning institutions; in the past two hundred years, the natural and social sciences emerged—at least in part—as modes of knowledge production for imperial planning. Yet these connections are frequently under-emphasized in the history of science and its corollary fields. The *Planning Moment* explores the myriad ways plans and planning practices pervade recent global history. The book is built around twenty-seven brief case studies that explore the centrality of planning in colonial and postcolonial environments, relationships, and contexts, through a range of disciplines: the history of science, science and technology studies, colonial and postcolonial studies, urban studies, and the history of knowledge. If colonialism made certain landscapes, populations, and institutions legible while obscuring others, *The Planning Moment* reveals the frequently disruptive and violent processes of erasure in imperial planning by examining how "common sense" was produced and how the intransigence of planning persists long after decolonization. In recognizing the resistance and subversion that often met colonial plans, the book makes visible a range of strategies and techniques by which planning was modified and reappropriated, and by which decolonial futures might be imagined. jaden smith political and economic: *Cities, Change, and Conflict* Nancy Kleniewski, Alexander R. Thomas, Gregory Fulkerson, 2024-06-28 *Cities, Change, and Conflict* was one of the first texts to embrace the perspective of political economy as its main explanatory framework, and then complement it with the rich contributions of human ecology as well as perspectives derived from critical approaches to social theory. Although its primary focus is on North American cities, the book contains several chapters on cities in other parts of the world, including the Global North and Global South. It provides both historical and contemporary accounts of the impact of globalization on urban development and urban institutions. This sixth edition features a new, groundbreaking chapter on the relationship between the physical environment and human settlements, including the urban-rural nexus. This edition also expands and updates coverage of recent trends such as the establishment and evolution of gay neighborhoods, the suburbanization of immigrant groups, the situation of the immigrant youth known as Dreamers, the reverse migration of Blacks from the North to the South, and the proliferation of exurban communities. Beyond examining the dynamics that shape the form and functionality of cities, the text surveys the experience of urban life among different social groups, including a new perspective on intersectionality as it affects people's experiences in cities. It illuminates the workings of the urban economy, local and federal governments, and the criminal justice system while addressing policy debates and decisions that

affect almost every aspect of urbanization and urban life.
