34 1 elements of behavior answer key: *From Neuron to Cognition via Computational Neuroscience* Michael A. Arbib, James J. Bonaiuto, 2016-11-04 A comprehensive, integrated, and accessible textbook presenting core neuroscientific topics from a computational perspective, tracing a path from cells and circuits to behavior and cognition. This textbook presents a wide range of subjects in neuroscience from a computational perspective. It offers a comprehensive, integrated introduction to core topics, using computational tools to trace a path from neurons and circuits to behavior and cognition. Moreover, the chapters show how computational neuroscience—methods for modeling the causal interactions underlying neural systems—complements empirical research in advancing the understanding of brain and behavior. The chapters—all by leaders in the field, and carefully integrated by the editors—cover such subjects as action and motor control; neuroplasticity, neuromodulation, and reinforcement learning; vision; and language—the core of human cognition. The book can be used for advanced undergraduate or graduate level courses. It presents all necessary background in neuroscience beyond basic facts about neurons and synapses and general ideas about the structure and function of the human brain. Students should be familiar with differential equations and probability theory, and be able to pick up the basics of programming in MATLAB and/or Python. Slides, exercises, and other ancillary materials are freely available online, and many of the models described in the chapters are documented in the brain operation database, BODB (which is also described in a book chapter). 34 1 elements of behavior answer key: *Evocations of the Calf?* Alec J. Lucas, 2014-12-11 This study proposes that both constitutively and rhetorically (through ironic, inferential, and indirect application), Ps 106(105) serves as the substructure for Paul's argumentation in Rom 1:18-2:11. Constitutively, Rom 1:18-32 hinges on the triadic interplay between "they (ex)changed" and "God gave them over," an interplay that creates a sin-retribution sequence with an a-ba-ba-b pattern. Both elements of this pattern derive from Ps 106(105):20, 41a respectively. Rhetorically, Paul ironically applies the psalmic language of idolatrous "(ex)change" and God's subsequent "giving-over" to Gentiles. Aiding this ironic application is that Paul has cast his argument in the mold of Hellenistic Jewish polemic against Gentile idolatry and immorality, similar to Wis 13-15. In Rom 2:1-4, however, Paul inferentially incorporates a hypocritical Jewish interlocutor into the preceding sequence through the charge of doing the "same," a charge that recalls Israel's sins recounted in Ps 106(105). This incorporation then gives way to an indirect application of Ps 106(105):23, by means of an allusion to Deut 9-10 in Rom 2:5-11. Secondarily, this study suggests that Paul's argumentation exploits an intra-Jewish debate in which evocations of the golden calf figured prominently.
