All the activities have been classroom tested, can be used with students of varying ability, and are effective as individual, group, or whole-class activities. For quick access and easy use, the activities are organized into 36 weekly packets—each packet including five “Dailies”—and printed in a big 8-1/4” x 11” lay-flat format for easy photocopying. Each “Dailies” activity begins with a well-written student passage followed by prompts that encourage students to examine the passage in terms of usage, stylistic devices, grammatical concepts, punctuation, and reading/literature skills. The activities require students to learn the rules that apply and to use the examples as springboards for their own writing. You'll find that these integrated “Dailies” activities are ideally flexible. They can be completed as “warm-ups” at the beginning of class, as mini-reviews for more advanced students, or serve as walk-through activities or homework assignments for students who need reinforcement. Each activity will lead to inquiry and lively discussion as students analyze the model passage and learn to write effectively.

This book is especially valuable for those teachers who want to integrate a child-centered curriculum beyond reading and writing; while grounded in holistic and constructivist literacy theory, it goes beyond language arts into math and science, into children conducting research and problem solving. What makes this book so valuable to teachers is its emphasis on application, with such features as: interviews with children in the midst of the creative process; detailed teaching strategies for fostering creativity; samples of students' work in science, math, social studies, and art to show the development of their thinking; a portfolio of color photos that shows what an innovative classroom can look like. Teachers will appreciate the numerous examples from inside classrooms, stressing issues that teachers and students confront and problems that arise and must be solved, even such nuts-and-bolts matters as classroom layouts and schedules.
