WHY PRAGMATICS MATTERS IN LINGUISTICS

PRAGMATICS IS A VITAL BRANCH OF LINGUISTICS THAT STUDIES HOW PEOPLE USE LANGUAGE IN REAL-LIFE SITUATIONS. THIS INCLUDES UNDERSTANDING SPEECH ACTS, IMPLICATURES, DEIXIS, POLITENESS STRATEGIES, AND CONVERSATIONAL MAXIMS.

FOR ANYONE STUDYING LINGUISTICS, GRASPING PRAGMATICS IS CRUCIAL BECAUSE IT BRIDGES THE GAP BETWEEN THEORY AND ACTUAL LANGUAGE USE. OXFORD TEXTBOOKS ON THIS TOPIC OFTEN HIGHLIGHT HOW PRAGMATICS INTERSECTS WITH SOCIOLINGUISTICS, COGNITIVE SCIENCE, AND DISCOURSE ANALYSIS, MAKING THEM A RICH RESOURCE FOR INTERDISCIPLINARY SCHOLARSHIP.

pragmatics oxford textbooks in linguistics: A Phi-Syntax for Nominal Concord Marco Benincasa, 2018-03-26 The book focusses on the grammatical feature definiteness in German, visible in the inflection of adjectives (ein schön-es Kind vs. das schön-e Kind). It argues for an analysis of

this effect that draws a connection to the visible categories of number and gender on nouns and related words rather than an abstract property. This conclusion rests on the conflation of the established grammatical categories into a single one, number-gender, which explains a vast body of grammatical phenomena in German and principles of language in general.

pragmatics oxford textbooks in linguistics: Hosios Saskia Peels, 2015-10-05

In *Hosios: A Semantic Study of Greek Piety* Saskia Peels elucidates the semantics of the Ancient Greek adjective *hosios* and its cognates. Traditionally rendered as 'piety', *hosios* was a key notion in Classical Greek religion and reflected a core value in Athenian democracy. Since antiquity, its meaning and usage have puzzled many. This study sets out to resolve various scholarly debates on the semantics of *hosios* by focusing on the idea of lexical competition. It illuminates the semantic relationship between *hosios* and its near-synonyms *eusebês* and *dikaïos*, and the connection to the notion of the 'sacred'. Using insights from modern linguistic theory, the book also aims to improve methods for research into the lexical semantics of a dead language.

pragmatics oxford textbooks in linguistics: The Socio-Cognitive Approach to

Communication and Pragmatics Istvan Kecskes, 2023-12-07 The book aims to serve as a theoretical framework for the socio-cognitive approach (SCA) that is an alternative to the two main lines of pragmatics research: linguistic-philosophical pragmatics and sociocultural-interactional pragmatics. SCA broadens the scope of the field with an intent to incorporate not only L1 communication but also intercultural communication, and communication in a second language. The author integrates the pragmatic view of cooperation and the cognitive view of egocentrism and emphasizes that both cooperation and egocentrism are manifested in all phases of communication, albeit to varying extents. SCA places equal importance on the social and cognitive individual factors in pragmatics. The author claims that while (social) cooperation is an intention-directed practice that is governed by relevance, (individual) egocentrism is an attention-oriented trait dominated by salience. The book serves as a theoretical guide for researchers and students who would like to understand how we need to change first language-based theories to make sense of what happens not only in L1 but also in intercultural and multi-lingual interactions.

Competence for Enhancing Efl University Students Written Performance Barham Sattar Abdulrahman, 2012-12-11 The book *Effects and Implications of Pragmatic Competence for Enhancing EFL University Students Written Performance* highlights the effects and implications of the Kurd EFL students lack of pragmatic competence on their written performance. It includes with the written performance of the students at the recognition level and the production level, and relies on the results achieved from its instruments: the students test, the students questionnaire, and the lecturers questionnaire. Depending on the results obtained from the tools, the study tries to identify

and find out the sources of errors in the written performance of the Kurd EFL university students. The book hypothesizes that the inadequacy of the students written performance could be attributed to the curricula and/or the students dependence on the grammatical aspects of the foreign language neglecting the pragmatic and the socio-cultural dimensions. This gives turn to state that the students written performance is better at the recognition level than the production due to the negative interference of their mother tongue. The book concludes that Kurd EFL learners at the university level face serious difficulties when writing in English. The inappropriateness of their written performance can be attributed to the negative effects of their first language, lack of contact with English native speakers and culture as well as the limited opportunities to have been in English speaking communities. Therefore, for enhancing EFL university students written performance, it is recommended that they should be introduced to the English culture through adding pragmatics and English Culture as two separate subject matters to the curricula, and to arrange summer courses for the students in English speaking countries, UK and US in particular.
