This book describes the evolution of the music industry from 1713 - the year parliament granted writers ownership over what they wrote - to today, when a global, 100 billion pound industry is controlled by just three major players: Sony, Universal and Warner. Inside you will uncover some little-known facts about the industry, including: how a formula for writing hit songs in the 1900s helped create 50,000 of the best-known songs of all time; how Jewish immigrants and black jazz musicians dancing cheek-to-cheek created a template for all popular music that followed; and how rock tours became the biggest, quickest, sleaziest and most profitable ventures the music industry has ever seen. Through it all, Napier-Bell balances seductive anecdotes - pulling back the curtain on the gritty and absurd side of the industry - with an insightful exploration of the relationship between creativity and money.
