lumen technologies human resources phone number: *Clusters and Sustainable Regional Development* Evgeniya Lupova-Henry, Nicola Francesco Dotti, 2022-11-10 *Clusters and Sustainable Regional Development* conceptualises the role of organised clusters in the transition towards sustainability. It introduces a novel perspective on these clusters, viewing them as deliberate collective actors within their environments that can become the driving force for transformation in their regions or nations. The book draws upon the meta-organisational perspective in cluster studies, in contrast to traditional approaches. This view suggests that clusters are not merely territories or geographical areas, but organised entities. As such, they are defined as territorially anchored groups of independent organisations engaging in joint decision-making, pursuing system-level goals and capable of purposive collective action. This text introduces a new set of ideas and questions at the intersection of economic geography, regional and cluster studies, organisation and management, policy and governance research. It will appeal to researchers from these diverse fields seeking to further develop the meta-organisational view of clusters as well as conceptualise their role in sustainability transitions. This book will also be a useful guide for policymakers who have an interest in the dynamics of economic development and the transition towards sustainability.

lumen technologies human resources phone number: *Innovating Energy Access for Remote Areas: Discovering Untapped Resources* Schäfer, Martina, Kammen, Daniel, Kebir, Noara, Philipp, Daniel, 2015-02-16 This volume centers on the idea that innovative approaches for

energy access can work with previously underutilized or unrecognized resources, as this may lead to circumstances for the development of successful and sustainable energy programs. Such untapped resources may be seen in the discovering of synergies in areas such as pre-existing service infrastructures, supply chain and value chain management, natural resource availability, financing schemes, and leap frog technologies. Additionally, decentralized approaches can contribute to climate change adaptation measures and increase resiliency for vulnerable communities. Of course small-scale solutions have clear limitations in regard to global climate, and it is important to consider how far they can extend and aggregate impact. This book assembles a selection of articles, collected from the 2014 Energy Access Conference at UC Berkeley, aiming to consider technical, financial, human, institutional, and natural resource capital. Im Fokus der Konferenz "Innovating Energy Access for Remote Areas: Discovering Untapped Resources", die vom 10. bis zum 12. April 2014 an der University of California stattfand, war der Zugang zu moderner Energieversorgung in strukturschwachen Regionen. Dieser Tagungsband trägt eine Reihe von innovativen Ansätzen zusammen, die auf der Konferenz diskutiert wurden. In den Beiträgen spiegeln sich aktuelle Konzepte, Theorien, Methoden und Techniken im Bereich der dezentralen Energieversorgung. Im Mittelpunkt vieler Beiträge steht die Frage, wie sich vormals ungenutzte oder unbekannte lokale Ressourcen nutzbar machen lassen. Neue Potentiale ergeben sich aus Synergien zwischen supply and value innovation, neuen Finanzierungsansätzen und der Nutzung sogenannte „leapfrog technologies“. Die Beiträge zeigen, wie dezentrale Ansätze und kleinteilige lokale Lösungen zur Bekämpfung des Klimawandels und die Anpassung an seine Folgen beitragen und die Resilienz gefährdeter Gemeinschaften stärken können.

lumen technologies human resources phone number: Energy Manual Manfred Hegger, Matthias Fuchs, Thomas Stark, Martin Zeumer, 2012-12-10 While the efficiency and sustainability offensive is in full swing in most sectors of the economy, in the construction sector it is still in its very beginnings – economically as well as ecologically. However, politicians and policymakers at the global, European, and national levels have begun to address this deficit and are seeking to correct it with legal requirements and laws like EnEV, building certifications, and competitions. Following the proven model of earlier manuals in the series, the Energy Manual presents a comprehensive look at the constructional parameters of energy efficiency and sustainability. It offers an advance look at the legal regulations being planned by the EU, and – as a tool ready for immediate use by architects, engineers, and designers in their daily work – it points the way toward the efficient and sustainable construction and operation of buildings. With its focus on the entire lifecycle of a building, it provides an integrated perspective – a necessary prerequisite for sustainable economic management.
