The contributors deal with visual and textual representations of performing animals; typologies of animals in the

theatre; the hybridization of the drama with the circus, the zoo, and the cinema; as well as the semiotic transfer of animal roles from the text to the stage. The focus lies on the changing historical fortunes of the four-footed actor and on exploring the ways that attitudes to the animal affect their dramatic representations – within aesthetic contexts but also in their dramatized scientific use. Exploring snapshots of acting animals from their earliest manifestation on the early modern stage, the chapters contextualize and theorize particular uses of the animal actor, and key into current debates on the cutting edge of animal performance studies. While seeking to consider how these theoretical perspectives were formed, the collection delves into the multiple ways through which the animal presence problematizes the practice of theatricality.
