praxis ii technology education 51 study guide: Racial Dimensions of Life Writing in Education Lucy E. Bailey, KaaVonia Hinton, 2022-09-01 This collection presents life writing projects that explore or represent the racial dimensions of life writing research in diverse educational spaces using diverse methodologies and inquiry approaches. We believe this collection is long overdue. To quote Melva R. Grant and Signe E. Kastberg's succinct phrasing (this volume) "racialized inquiry matters." While some rich texts explore the racial aspects and anti-racist potential of social science research (Blee, 2018; Lopez & Parker, 2003; Sefa Dei & Johal, 2005;

Twine & Warren, 2000), and include examples from educational contexts, there are no collections which focus on the intersections of life writing inquiry as educative projects that highlight racial dimensions of the work and lives under study. Drawing from Toni Morrison's enduring wisdom, a visionary writer whose work has explored the racial dimensions of culture and lived experience, we centralize race in life writing in this collection rather than obscuring it or leaving it as a lurking, absent presence in the craft. Racial Dimensions of Life Writing Research offers a wealth of ideas and perspectives from which scholars, teachers, and students can draw to support their work. The 14 chapters in this collection attend to national, international, and local concerns, include varied theoretical and methodological approaches, and reflect a range of ethnic and racial heritages. Chapters consider practical, theoretical, ethical, and educational issues involved in projects concerning under-represented educational actors important for the terrain of life writing. The authors include established and emerging scholars— university researchers, directors, and professors, academic advisors, graduate and undergraduate students, activists, and former elementary and secondary school teachers. It is our hope that this volume will spark conversation, debate, and reflection and will be a valuable resource that inspires scholarship about how race and its intersections shape the life-writing inquiry process. ENDORSEMENT: This is an exceptionally important volume interrogating intersections of race, racism and life writing. Authors recenter life narrative as a necessary anchor for studying, teaching about, and learning through complex racial dynamics. This book should be read by any of us serious about studying and advancing knowledge on race and writing. — Richard Milner, Vanderbilt University

Drawing on over two decades of engagement as critical friends, the authors advocate for critical friendship as a means to enhance research rigor. Long valued within self-study methodology, critical friendship offers researchers opportunities for collaboration, inquiry, and reflection. Despite its widespread use, ambiguity persists about its enactment. This book addresses the need for a comprehensive resource on critical friendship application focused solely on the theoretical and methodological understanding of critical friendship. It offers clarity on tools while exploring the complexities of critical friendship. This book makes a significant contribution to the field by expanding on key topics such as trustworthiness, characteristics of critical friendship, and the selection and evaluation of critical friends. It is

designed for both seasoned and novice qualitative self-study scholars, providing insight for those seeking to integrate critical friendship into their research practice.

praxis ii technology education 51 study guide: Emerging Realities and the Future of Technology in the Classroom Jaafar, Inaya, Pedersen, James M., 2021-04-23 The COVID-19 pandemic has shed light on how much humans rely, more than ever before in our history, on technology. While technology in its simplest definition is the use of a tool for a practical purpose, in the last three decades, educators can confidently say it has revolutionized how information is communicated and accessed. Most importantly, educators who had to recently shift their classes online understood the important role of technology to stay connected and instruct students remotely. There are many different facets of technology in today's classrooms and ideas on where educators are headed in preparing their students for a technology-rich world. With new technologies being constantly developed and new scenarios rising to the surface in the educational environment, the future of technology in the classroom is widespread, consistently growing, and always advancing with more technological reliance. *Emerging Realities and the Future of Technology in the Classroom* provides an understanding on how technology is integrated into today's classroom and how institutions can be further informed of the importance of technology in today's world. This book examines a variety of pertinent topics that look at the present and future potential roles of technology in the classroom. While highlighting topics such as STEM in online education, leadership and technology, new instructional models in online learning, and gaming in education, this book is essential for teachers across all disciplines and in higher education and K-12, school administrators, principals, instructional designers, librarians, media specialists, educational software developers, educational technologists, IT specialists, practitioners, researchers, academicians, and students interested in the current status of technology in the classroom and its potential role in education for the years ahead.

praxis ii technology education 51 study guide: The SAGE Encyclopedia of Educational Technology J. Michael Spector, 2015-01-29 The SAGE Encyclopedia of Educational Technology examines information on leveraging the power of technology to support teaching and learning. While using innovative technology to educate individuals is certainly not a new topic, how it is approached, adapted, and used toward the services of achieving real gains in student performance is extremely pertinent. This two-volume encyclopedia explores such issues, focusing on core topics and issues that will retain relevance in the face of perpetually evolving devices, services, and specific techniques. As technology evolves and becomes even more low-cost, easy-to-use, and more accessible, the education sector will evolve alongside it. For instance, issues surrounding reasoning behind how one study has shown students retain information better in traditional print formats are a topic explored within the pages of this new encyclopedia. Features: A collection of 300-350 entries are organized in A-to-Z fashion in 2 volumes available in a choice of print or electronic formats. Entries, authored by key figures in the field, conclude with cross references and further readings. A detailed index, the Reader's Guide themes, and cross references combine for search-and-browse in the electronic version. This reference encyclopedia is a reliable and precise source on educational technology and a must-have reference for all academic libraries.

praxis ii technology education 51 study guide: *Cultivating a Culture of Experimentation in Higher-education Teaching and Learning* Robert Kordts, Dietrich Wagner, Claudio Sidler, Karen Tinsner-Fuchs, Bernadette Dilger, Taiga Brahm, 2021 As indicated by the diversity of the authors' physical locations, COVID and emergency-remote teaching affected Higher-Education-Institutions at a nearly global scale. Authors in this issue come from European countries (Switzerland, Germany), North America (the USA) as well as the southern hemisphere (South Africa). Given the breadth of COVID-related (change) experiences, the insights presented in this issue can be relevant to many HEIs across the globe, notwithstanding their cultural and institutional specificities. In addition, and of high relevance to us, the articles collected here focus both on different positions or roles (students, faculty, management) as well as on different levels of teaching and learning in higher education. While most contributions focus on the student experience during COVID, others

investigate faculty/instructors' perspectives including faculty development. Yet another group takes a more systemic, institutional point of view. It could be argued that higher-education research takes up a multi-level perspective when exploring change and the new normal.
