chasing space young readers edition: The Six -- Young Readers Edition Loren Grush, 2025-02-11 Two starred reviews! The extraordinary true story of America's first female astronauts hailed as "suspenseful, meticulously observed, enlightening" by Margot Lee Shetterly, #1 New York Times bestselling author of Hidden Figures, now adapted for young readers. Sally Ride may have been the first US woman in space, but did you know there were five other incredible American women who helped blaze the trail for female astronauts by her side? When NASA sent astronauts to the moon in the 1960s and 1970s, the agency excluded women from the corps, arguing that only military test pilots—a group women were also aggressively barred from—had the right stuff. But as the 1980s dawned so did new thinking, and six elite women scientists—Sally Ride, Judith Resnik, Anna Lee Fisher, Kathy Sullivan, Shannon Lucid, and Rhea Seddon—set out to prove they had exactly the right stuff to become the first US women astronauts. In The Six Young Readers Edition,

acclaimed journalist Loren Grush shows how these brilliant and courageous women fought to enter STEM fields they were discouraged from pursuing, endured claustrophobic—and often deeply sexist—media attention, underwent rigorous survival training, and prepared for years to take multi-million-dollar equipment into orbit. Told with contributions from nearly all the living participants and now adapted for young readers, this book is an inspiring testament to their struggles, accomplishments, and sacrifices and how they built the tools that made the space program run. It's a legacy that lives on to inspire young people today.

chasing space young readers edition: Star Trek: Dark Universe (Reader's Version) Craig Morrin, 2021-12-12 The fate of the multiverse hangs in the balance between three critical points in time... Stardate 2264.5: Captain Kirk (Chris Pine) is getting ready to start his five-year mission into the Robidian Nebula after defeating Krall's invasion of the Yorktown Starbase (Star Trek Beyond)--when something happens that changes everything. Integrating the Prime and Kelvin Universe's two Captain Kirks (Pine and William Shatner), they, along with Jean-Luc Picard, Kathryn Janeway, Q, Guinan, Data, Deanna Troi, Seven of Nine, Wesley Crusher, and the entire crew from the newest Star Trek movies, must all work together to reverse a terrible mistake from the past, culminating in an epic confrontation between Starfleet and their counterparts in the mirror universe: the Terran Empire. When a new Star Trek movie that was meant to follow Star Trek Beyond got canceled back in 2017, I decided to write my own script. I wanted it to follow true Star Trek canon, and to be the continuation after Star Trek Beyond. I also wanted it to have a superstar cast that not only included the entire reboot crew with Chris Pine as Captain Kirk, but also some of my favorite characters including Jean-Luc Picard, Kathryn Janeway, Q, as well as the original Captain Kirk, played by William Shatner. This script is equivalent to a two-hour movie and is inspired by the most recent Star Trek movies, along with Star Trek: Generations, and by The Tholian Web (from the original series); In a Mirror, Darkly (Star Trek: Enterprise); and Coda (Star Trek: Voyager). This version is in what I call condensed manuscript format that is more reader friendly without all of the blocks and spacing. There is also a version in full Hollywood script format (with the exact same words): <https://play.google.com/store/books/details?id=eRBzEQAAQBAJ>

chasing space young readers edition: Fairground Attractions Deborah Philips, 2012-01-01 The study investigates the cultural production of the visual iconography of popular pleasure grounds from the eighteenth century pleasure garden to the contemporary theme park. Deborah Philips identifies the literary genres, including fairy tale, gothic horror, Egyptiana and the Western which are common to carnival sites and traces their historical transition across a range of media to become familiar icons of popular culture. Though the bricolage of narratives and imagery found in the contemporary leisure zone has been read by many as emblematic of postmodern culture, the author argues that the clash of genres and stories is less a consequence of postmodern pastiche than it is

the result of a history and popular tradition of conventionalized iconography.

chasing space young readers edition: *Space in Ancient Greek Literature* I.J.F. de Jong, 2012-03-20 The third volume of the Studies in Ancient Greek narrative deals with the narratological category of space: how is space, including objects which function as 'props', presented in narrative texts and what are its functions (thematic, symbolic, psychologising, or characterising).

chasing space young readers edition: *A Project Guide to the Solar System* Colleen Kessler, 2010-12-23 From ancient times, people have wanted to learn about the sky. The stars, planets, and other heavenly bodies have been observed for centuries, and theories have changed as the equipment used has improved. Though we now know that the Sun is the center of our solar system, and planets and other objects move around it, we still have a lot to learn. What is a comet made of? Why is Pluto now called a dwarf planet? What causes a solar eclipse? A lunar eclipse? This book will help you answer these questions and more. Whether you try the experiments and activities in this book for fun or for a school project, you'll discover why so many people are fascinated by our solar system.

chasing space young readers edition: *Animals and Ourselves* Kathy Merlock Jackson, Kathy Shepherd Stolley, Lisa Lyon Payne, 2020-10-13 The relationship between humans and animals has always been strong, symbiotic and complicated. Animals, real and fictional, have been a mainstay in the arts and entertainment, figuring prominently in literature, film, television, social media, and live performances. Increasingly, though, people are anthropomorphizing animals, assigning them humanoid roles, tasks and identities. At the same time, humans, such as members of the furry culture or college mascots, find pleasure in adopting animal identities and characteristics. This book is the first of its kind to explore these growing phenomena across media. The contributors to this collection represent various disciplines, to include the arts, humanities, social sciences, and healthcare. Their essays demonstrate the various ways that human and animal lives are intertwined and constantly evolving.
