national geographic tv guide: Halfway Tom Macher, 2018-02-06 From a searing new literary voice, a raw, compulsively readable memoir about a young man seeking hope, community, and ultimately recovery from addiction in a series of halfway houses and boys' homes—the first book to so vividly capture this world. In his late teens Tom Macher rebelled against a world that seemed stacked against him. Raised in a broken family and estranged from an absentee father suffering with AIDS, Macher turned to alcohol to escape the painful loneliness of his reality. In quick succession, he is kicked out of school, and then his mother's house, sent to a boys' home in Montana, and later, a halfway house in a truck-stop town of Louisiana. It was there that Macher encounters a community of young men struggling to survive—outcasts and thieves, liars and ex-cons, men seeking redemption, men running from the past. As he moves further away from boyhood and embraces a hard-won sobriety, these men—the broken, the hardscrabble, the near gone—become his salvation. Macher captures the trials of sobriety—suicide, death, recovery—and the unusual beauty that forms

in the bonds of those who suffer. In visceral, striking prose, he introduces the unforgettable characters he meets along the way, from a former child actor, a young teen struggling with schizophrenia, a tough-love addiction counselor, a sex-addicted social worker, to Matt O, who became Macher's loyal friend and wingman. Raw, disarming, frenetic, and subversive, *Halfway* is a brutally honest portrait of the world of down-and-out recovering alcoholics, and a story of how, in their darkest hour, these men create the bonds that form a family.

Using critical discourse analysis and cognitive linguistic models, this book builds a Spectrum of Trial by Media which views juries in criminal trials as moulded by ideological media-made constructions of crime. The role of these media constructions is enhanced by the isolation levied on jurors by the linguistic composition of trial language, and reinforced by the language strategies of legal professionals in court. Critically deconstructing media portrayals of crime and forensically examining the language of criminal proceedings, this book offers a redefinition of trial by media which casts the role of the press as much more prevalent in the courtroom trial than is presently appreciated.

national geographic tv guide: *Communication and Aging* Jon F. Nussbaum, Loretta L. Pecchioni, James D. Robinson, Teresa L. Thompson, 2013-05-13 This text employs a communication perspective to examine the aging process and the ability of individuals to adapt successfully to aging. It continues the groundbreaking work of the first edition, emphasizing a life-span approach toward understanding the social interaction that occurs during later life. The edition provides a comprehensive update on the existing and emerging research within communication and aging studies and considers such topics as notions of successful aging, positive and negative stereotypes toward older adults, and health communication issues. It raises awareness of the barriers facing elderly people in conversation and the importance such conversations have in elderly people's lives. The impact of nonrelational processes, such as hearing loss, are considered as they impact relationships with others and affect the ability to age successfully. The book is organized into 14 chapters. Each chapter is written so that the reader is presented with an exhaustive review of the pertinent and recent literature from the social sciences. As in the first edition, when the literature is empirically based, the communicative ramifications are then discussed. Readers of this volume will gain greater understanding of the importance of their communicative relationships and how significant they remain across the life span. Developed for students in communication, psychology, nursing, social gerontology, sociology, and related areas, *Communication and Aging* provides important insights on communication to all who are affected by the aging process.

national geographic tv guide: *Intellectual Property and Information Wealth* Peter K. Yu, 2006-12-30 Until recently, issues of intellectual property were relegated to the experts—attorneys, legal scholars, rightsholders, and technology developers who wrangled over interpretations and enforcement of copyright, patent, and trademark protections. But in today's knowledge-based economy, intellectual property protection has taken on fundamentally new proportions, as a subject of urgency for businesses (whose survival depends on protection of their intangible assets) and as a subject of cultural importance that grabs front-page headlines (as the controversy over Napster and high-profile revelations of plagiarism, for example, have illustrated). This landmark set of essays brings new clarity to the issues, as societies around the world grapple with the intricacies and complexities of intellectual property, and its impact on business, law, policy, and culture. Featuring insights from leading scholars and practitioners, *Intellectual Property and Information Wealth* provides rigorous analysis, historical context, and emerging practical applications from the public, private, and non-profit sectors. Volume 1 focuses on protections to novels, films, sound recordings, computer programs, and other creative products, and covers such issues as authorship, duration of copyright, fair use of copyrighted materials, and the implications of the Internet and peer-to-peer file sharing. Volume 2 explains the fundamental protections to inventors of devices, mechanical processes, chemical compounds, and other inventions, and examines such issues as the scope and limits of patent protection, research exemptions and infringement, IP in the software and biotech industries, and trade secrets. Volume 3 looks at the protections to distinctive symbols and signs, including brand names and unique product designs, and features chapters on consumer protection, trademark and the first amendment, brand licensing, publicity and cultural images, and domain names. Volume 4 takes the discussion to the global level, addressing a wide range of issues, including not only enforcement of IP protections across borders, but also their implications for international trade and investment, economic development, human rights, and public health.

national geographic tv guide: *The Rhetoric of the New Political Documentary* Thomas W. Benson, Brian J. Snee, 2008-05-23 *The Rhetoric of the New Political Documentary* explores the most visible and volatile element in the 2004 presidential campaign—the partisan documentary film. This collection of original critical essays by leading scholars and critics—including Shawn J. and Trevor Parry-Giles, Jennifer L. Borda, and Martin J. Medhurst—analyzes a selection of political documentaries that appeared during the 2004 election season. The editors examine the new political

documentary with the tools of rhetorical criticism, combining close textual analysis with a consideration of the historical context and the production and reception of the films. The essays address the distinctive rhetoric of the new political documentary, with the films typically having been shot with relatively low budgets, in video, and using interviews and stock footage rather than observation of uncontrolled behavior. The quality was often good enough and interest was sufficiently intense that the films were shown in theaters and on television, which provided legitimacy and visibility before they were released soon afterwards on DVD and VHS and marketed on the Internet. The volume reviews such films as Michael Moore's *Fahrenheit 9/11*; two refutations of Moore's film, *Fahrenheit 9/11* and *Celsius 41.11*; *Unprecedented: The 2000 Presidential Election*; and *George W. Bush: Faith in the White House*—films that experimented with a variety of angles and rhetorics, from a mix of comic disparagement and earnest confrontation to various emulations of traditional news and documentary voices. *The Rhetoric of the New Political Documentary* represents the continued transformation of American political discourse in a partisan and contentious time and showcases the independent voices and the political power brokers that struggled to find new ways to debate the status quo and employ surrogate "independents" to create a counterrhetoric.
