art history courses nyc: *Making Art Panamerican* Claire F. Fox, 2013-02-26 Among the buildings on the National Mall in Washington, D.C., only the Pan American Union (PAU) houses an international organization. The first of many anticipated "peace palaces" constructed in the early twentieth century, the PAU began with a mission of cultural diplomacy, and after World War II its Visual Arts Section became a leader in the burgeoning hemispheric arts scene, proclaiming Latin

America's entrée into the international community as it forged connections between a growing base of middle-class art consumers on one hand and concepts of supranational citizenship and political and economic liberalism on the other. *Making Art Panamerican* situates the ambitious visual arts programs of the PAU within the broader context of hemispheric cultural relations during the cold war. Focusing on the institutional interactions among aesthetic movements, cultural policy, and viewing publics, Claire F. Fox contends that in the postwar years, the PAU Visual Arts Section emerged as a major transfer point of hemispheric American modernist movements and played an important role in the consolidation of Latin American art as a continental object of study. As it traces the careers of individual cultural policymakers and artists who intersected with the PAU in the two postwar decades—such as Concha Romero James, Charles Seeger, José Gómez Sicre, José Luis Cuevas, and Rafael Squirru—the book also charts the trajectories and displacements of sectors of the U.S. and Latin American intellectual left during a tumultuous interval that spans the Mexican Revolution, the Spanish Civil War, the New Deal, and the early cold war. Challenging the U.S. bias of conventional narratives about Panamericanism and the postwar shift in critical values from realism to abstraction, *Making Art Panamerican* illuminates the institutional dynamics that helped shape aesthetic movements in the critical decades following World War II.

art history courses nyc: The Art of Curating Sally Anne Duncan, Andrew McClellan, 2018-08-07 From 1921 until 1948, Paul J. Sachs (1878-1965) offered a yearlong program in art museum training, "Museum Work and Museum Problems," through Harvard University's Fine Arts Department. Known simply as the Museum Course, the program was responsible for shaping a professional field—museum curatorship and management—that, in turn, defined the organizational structure and values of an institution through which the American public came to know art. Conceived at a time of great museum expansion and public interest in the United States, the Museum Course debated curatorial priorities and put theory into practice through the placement of graduates in museums big and small across the land. In this book, authors Sally Anne Duncan and Andrew McClellan examine the role that Sachs and his program played in shaping the character of art museums in the United States in the formative decades of the twentieth century. *The Art of Curating* is essential reading for museum studies scholars, curators, and historians.

art history courses nyc: Michelangelo's Sculpture Leo Steinberg, 2018-11-28 Leo Steinberg was one of the most original and daring art historians of the twentieth century, known for taking interpretative risks that challenged the profession by overturning reigning orthodoxies. In essays and lectures that ranged from old masters to contemporary art, he combined scholarly erudition with an eloquent prose that illuminated his subject and a credo that privileged the visual evidence of the image over the literature written about it. His works, sometimes provocative and controversial, remain vital and influential reading. For half a century, Steinberg delved into Michelangelo's work, revealing the symbolic structures underlying the artist's highly charged idiom. This volume of essays and unpublished lectures explicates many of Michelangelo's most celebrated sculptures, applying principles gleaned from long, hard looking. Almost everything Steinberg wrote included passages of old-fashioned formal analysis, but here put to the service of interpretation. He understood that Michelangelo's rendering of figures as well as their gestures and interrelations conveys an emblematic significance masquerading under the guise of naturalism. Michelangelo pushed Renaissance naturalism into the furthest reaches of metaphor, using the language of the body and its actions to express fundamental Christian tenets once expressible only by poets and preachers—or, as Steinberg put it, in Michelangelo's art, "anatomy becomes theology." *Michelangelo's Sculpture* is the first in a series of volumes of Steinberg's selected writings and unpublished lectures, edited by his longtime associate Sheila Schwartz. The volume also includes a book review debunking psychoanalytic interpretation of the master's work, a light-hearted look at Michelangelo and the medical profession and, finally, the shortest piece Steinberg ever published.

art history courses nyc: A History of Art History Christopher S. Wood, 2019-09-03 An authoritative history of art history from its medieval origins to its modern predicaments In this wide-ranging and authoritative book, the first of its kind in English, Christopher Wood tracks the evolution of the historical study of art from the late middle ages through the rise of the modern scholarly discipline of art history. Synthesizing and assessing a vast array of writings, episodes, and personalities, this original account of the development of art-historical thinking will appeal to readers both inside and outside the discipline. The book shows that the pioneering chroniclers of the Italian Renaissance—Lorenzo Ghiberti and Giorgio Vasari—measured every epoch against fixed standards of quality. Only in the Romantic era did art historians discover the virtues of medieval art, anticipating the relativism of the later nineteenth century, when art history learned to admire the art of all societies and to value every work as an index of its times. The major art historians of the

modern era, however—Jacob Burckhardt, Aby Warburg, Heinrich Wölfflin, Erwin Panofsky, Meyer Schapiro, and Ernst Gombrich—struggled to adapt their work to the rupture of artistic modernism, leading to the current predicaments of the discipline. Combining erudition with clarity, this book makes a landmark contribution to the understanding of art history.

art history courses nyc: A New History of Western Art Koenraad Jonckheere, 2022-10-15 A radical re-examination of 2,500 years of European art, deconstructing and demystifying its long history from ancient to present How has art evolved from the pursuit of the 'ideal' human form to a black square on a white canvas? Why is a banana duct-taped to a wall worth more on the art market than a beautiful seventeenth-century landscape? By taking art for what it actually is -- a piece of stone or wood, a sheet of paper with some lines drawn on it, a painted canvas -- this lively and accessible account shows how seemingly meaningless objects can be transformed into celebrated works of art. Breaking with conventional notions of artistic genius, Koenraad Jonckheere explores how stories and emotions give meaning to objects, and why changing historical circumstances result in such shifting opinions over time. Tracing its story from ancient times to present, *A New History of Western Art* reframes the evolution of European art and radically reshapes our understanding of art history. Published in association with Hannibal Books

This fascinating spectrum of studies into the various rationalities of our human dealings with life - psychological, aesthetic, economic, spiritual - reveals their joints and calls for a new approach to truth. Putting both classical and contemporary conceptions aside, we find the primogenital ground of truth in the networks of correspondences, adequations, relevancies, and rationales at work in life's becoming. Does this plurivocal differentiation mean that the status of truth is relative? On the contrary, submits Anna-Teresa Tymieniecka, given the universal significance of the crucial instrument of the logos of life, truth is the vortex of life's ontopoietic unfolding.
