The tab notation for this song provides a visual representation of the fretboard, showing you exactly where to place your fingers to produce the song's signature sound.

## The Main Riff Breakdown

The main riff of breaking the law is played using power chords and palm-muted open strings, creating a punchy rhythm that drives the song forward. The riff is usually played on the low E and A strings, giving it that heavy, chunky tone.

Here's a simple breakdown of the riff:

- Start with the open low E string, palm-muted to give a percussive effect.
- Move to the F power chord at the 1st fret of the E string and 3rd fret of the A string.
- Then jump to the Eb power chord at the 1st fret of the A string and 3rd fret of the D string.
- The riff repeats with a steady rhythm, making it perfect for practicing timing and muting techniques.

By mastering this riff, you'll not only get the feel of the song but also improve your overall rhythm guitar skills.

# Reading Guitar Tabs for Breaking the Law

If you're new to guitar tabs, it's important to understand how they work before diving into this classic track. Guitar tabs are written on six lines representing the guitar strings, with numbers indicating the fret to play.

When playing breaking the law, pay attention to:

- **Palm muting**, often indicated by "PM" or a series of dots beneath the tablature.
- **Power chords**, which are typically played on two or three strings and have a distinct, heavy sound.
- **Rhythm and timing**, which can be gleaned from the spacing between notes on the tab.

Taking the time to read and interpret the breaking the law guitar tab accurately will help you play with the right feel and energy.

## Techniques to Nail the Breaking the Law Guitar Parts

While the breaking the law guitar tab might seem straightforward, several guitar techniques can elevate your performance and bring authenticity to your playing.

### Palm Muting

Palm muting is a key element in this song. It involves lightly resting the edge of your picking hand near the bridge of the guitar to dampen the strings. This creates a tight, muted sound that adds rhythmic punch to the riff.

To practice:

- Place the palm of your picking hand just before the bridge.
- Pick the string while maintaining light pressure with your palm.
- Experiment with the amount of pressure to find the sweet spot where the note is muted but still clear.

This technique is crucial for replicating the driving groove of breaking the law.

## Alternate Picking

The fast-paced nature of the song's riffs benefits from alternate picking, which involves alternating downstrokes and upstrokes with your picking hand. This technique increases speed and efficiency while maintaining a clean sound.

Start slow with a metronome:

- Play the riff at a comfortable tempo.
- Focus on consistent down-up picking.
- Gradually increase the speed as you become more confident.

Mastering alternate picking will help you keep the energy up throughout breaking the law and other metal songs.

## Power Chords and Muting

Power chords are the backbone of breaking the law's riff. They are simple to play but require precision to sound tight and powerful.

Here's a quick tip:

- Use your index finger to bar the root note on the lowest string.
- Use your ring and pinky fingers to fret the fifth and octave notes.
- Make sure the strings you don't want to ring are muted with your fretting hand or picking hand.

Combining power chords with palm muting creates the aggressive tone that Judas Priest is known for.

## Exploring the Solo and Lead Guitar Sections

Breaking the law isn't just about rhythm guitar; the lead guitar parts add flair and energy to the track. The solo features classic metal techniques like bends, hammer-ons, pull-offs, and fast runs.

## Breaking the Law Solo Tab Insights

The solo starts with a melodic phrase that uses the minor pentatonic scale, a favorite among metal guitarists for its bluesy yet aggressive sound.

Key points to focus on:

- **\*\*Bends:\*\*** Make sure to bend the string to the target pitch, not too sharp or flat.
- **\*\*Hammer-ons and pull-offs:\*\*** These techniques allow for smooth note transitions and speed.
- **\*\*Vibrato:\*\*** Adding vibrato on sustained notes gives expressiveness to the solo.

Practicing these techniques slowly and accurately will help you capture the essence of the breaking the law guitar solo.

## Using Effects to Emulate the Sound

To get closer to the original sound, consider using a distortion pedal and possibly a wah pedal for the lead parts. Judas Priest used a rich distortion tone that gives the guitar its signature bite.

Tips for dialing in your tone:

- Use moderate gain on your distortion pedal to avoid muddiness.
- Adjust the tone controls to accentuate midrange frequencies.
- Slightly boost the treble for clarity during solos.

Experiment with your gear to find the right balance that complements your playing style and the song's vibe.
