Icc Exam 550 Study Guide

icc exam 550 study guide: Domesticating International Criminal Law Florian Jeßberger, Chantal Meloni, Maria Crippa, 2023-06-01 This book provides an essential and critical overview of the most significant issues concerning the domestication of international criminal law, in particular with regard to the implementation of the ICC Statute. It discusses the most recent proposals for reform of the German Code of Crimes under International Law, the Völkerstrafgesetzbuch, 20 years after its entering into force and introduces the project for an Italian code of international crimes drafted by the Committee of experts established in 2022 by the Ministry of Justice. Following the adoption of the ICC Statute, many States, including Germany with the Völkerstrafgesetzbuch, introduced specific legislation to incorporate international criminal law into their domestic legal systems and a considerable number of them have been investigating and prosecuting war crimes, crimes against humanity, genocide, and even aggression ever since. Twenty-five years later, however, the process is not completed as other countries, like Italy, are still working on adopting provisions on international crimes. This book opens with a broad overview of the different approaches of the domestication of international criminal law, with a specific focus on the German and the Italian systems. After an assessment of the prerequisites for the domestic implementation of international criminal law, also from a constitutional law perspective, each chapter offers an in-depth analysis of a specific issue, such as: the definition of international crimes (genocide and crimes against humanity, war crimes and aggression); the applicability of and exceptions to the general principles of domestic criminal law; the regulation of individual criminal responsibility; sanctions and sentencing; as well as procedural aspects related to immunities, jurisdiction and prosecutorial discretion. The strong academic perspective of many authors is complemented by an equally strong practitioner perspective of the others, provided by legal scholars in the highest positions in international and national judicial institutions, resulting in a well-informed and critical appraisal of the most recent developments overall in the international criminal justice system. Domesticating International Criminal Law will be of great interest to legal scholars and students, as well as practitioners with an interest in comparative and international law, international criminal law and international relations.

icc exam 550 study guide: **The Application of the Third Generation of Cognitive-Behavioral Approaches to Parenting** Helena Moreira, Eva S. Potharst, Maria Cristina Canavarró, 2019-12-10 In recent years, there has been growing interest in understanding how the third generation of cognitive-behavioral approaches, particularly mindfulness-, compassion-, and acceptance-based approaches, can contribute to the design of more efficacious parenting interventions and to a better understanding of parenting behaviors and the parent-child relationship. However, the application of third-generation cognitive-behavioral therapies and concepts to parenting is still in its infancy, and further research is needed to explore the potential of these approaches to enhance existing parenting interventions or to inform the development of new parenting interventions targeting different groups of parents and their children. More research is also needed to understand how mindfulness, (self-)compassion, acceptance and other related psychological processes may influence parenting practices, the parent-child relationship, and the child’s socioemotional development. With this e-book, presenting state-of-the-art research articles on third generation cognitive-behavioral approaches, a new step is taken in 1) exploring relations between parenting-related issues and concepts from the third generation cognitive-behavioral framework, and 2) examining parenting-interventions informed by third-generation cognitive-behavioral therapies.

Legal, economic, political and institutional aspects of network access are analyzed. The first part of the volume focuses on five topics that are central to reasoned analysis of the access problem. The second part presents ten case studies of

network access in the energy, transportation, telecommunications, internet and banking industries. The volume concludes with comparisons and contrasts across the cases and policy recommendations.
