university of arkansas biology major: The Possum Hunter S. Earl Wilson III, 2019-02-08 This is a tale of life, defining everything that we are and hope to become, such as finding love, education, success, and security by overcoming adversities to find happiness. It begins with simple people who find love in the remote areas of Mississippi while hunting raccoons together. They are simple people with simple lives doing simple things. We all lust, we hunger, we suffer, we enjoy. At times, we are deceived. Sometimes, we learn the truth that is often concealed but is revealed to us by someone of higher intellect. We love, we play, we fight, and we rescue and are rescued. Regardless of others'

opinions, we eat what we like. We hunt even if it is nothing more than a bargain at a store. We are all victims of in flagrante delicto—the act of doing something wrong, especially like having illicit sex. You will perhaps find your own self while reading this story.
