chapter 26 the united states in todays world powerpoint: Policy Transfer and Learning in Public Policy and Management Peter Carroll, Richard Common, 2013-06-26 A typical image of the making and administration of policy suggests that it takes place on an incremental basis, involving public servants, their ministers and, to a more limited extent, a variety of interest groups. Yet, much policy making is based on similar policy developed in other jurisdictions and in the major

international organizations such as the WTO and the OECD. In other words, significant aspects of nationally developed policies are copied from elsewhere in what is described as a process of policy transfer and learning. Hence, studies of policy transfer have pointed to a distinct limitation in most existing theoretical and empirical explanations as to how policy is made and implemented through their neglect of the role of policy transfer and learning. Moreover, policy transfer is not only a concern of academics, but a growing concern for governments. The latter are concerned to improve the performance of their policy and several have placed a greater, more systematic focus on policy transfer as a means to increasing performance. This book presents a variety of cases from differing national and international contexts that enable a valuable, comparative analysis that is absent from most literature currently available and that suggest a number of exciting research directions with implications for policy making, transference and implementation in the future.

chapter 26 the united states in todays world powerpoint: *America, We Need to Talk* Joel Berg, 2017-02-28 The newest book by Joel Berg--an internationally recognized leader and media spokesman in the fields of hunger, poverty, food systems, and U.S. politics, and the director of Hunger Free America--*America We Need to Talk: A Self-Help Book for the Nation* is both a parody of relationship and self-help books and a serious analysis of the nation's political and economic dysfunction. Explaining that the most serious--and most broken--relationship is the one between us, as Americans, and our nation, the book explains how, no matter who becomes our next president, average Joes can channel their anger at our hobbled system into concrete actions that will fix our democracy, rebuild our middle class, and restore our stature in the world as a beacon of freedom and hope. Starting with the belief that it's irresponsible for Americans to blame the nation's problems solely on the politicians or the system, Joel makes a case for how it's the personal responsibility of every resident of this country to fix it. The American people are in a relationship with their government and their society, and, as in all relationships, it's the responsibility of both sides to recognize and repair their problems.

chapter 26 the united states in todays world powerpoint: Research Methods in the Social and Health Sciences Ted Palys, Chris Atchison, 2021-02-05 Research Methods in the Social and Health Sciences: Research Decisions, by Ted Palys and Chris Atchison, gives students a thorough, thoughtful, and highly readable introduction to the entire research process from start to finish. From its underlying premise that your research questions and objectives, rather than any specific method, should guide your research, this book discusses each step of the research process, from limiting the scope of a literature review to navigating ethical considerations to deciding which methods are best suited for finding answers to specific research questions to how to analyze data and present findings. Readers are encouraged to think deeply about each step of the research process. The book promotes this deliberation by discussing the strengths and limitations of different methods and. Throughout the process, the authors provide many examples from their own and student research, sharing insights for research decisions arising from that experience. Readers will develop the skills to create solid research questions, perform literature reviews, identify appropriate data sources and methods, conduct research, analyze and interpret data and translate the resulting knowledge generated from the research process to a wider audience- all core parts of the research process -by developing their knowledge and creating confidence in their own decision-making skills. After explaining the unique and often complementary strengths of qualitative and quantitative methods, students focus on what methods are best suited for finding answers to the research questions that interest them. Major types of research including experiments, case studies, surveys, quasi-experiments, ethnographies, focus groups, participatory action research, and archival studies all receive significant coverage. The text illustrates how these methods are enhanced by integrating them with 21st century technologies and combining them in mixed methods projects. Chapters on constructing a research proposal and disseminating research bookend the process with concrete steps in between to support students designing their own original research projects. Study questions at the end of each chapter encourage students to think critically about the research process and how the choices a researcher makes will broaden or constrain what they can find. By the end of the text, social and health science students will feel confident in undertaking ethical and thoughtful research.

chapter 26 the united states in todays world powerpoint: Angkor Wat - A Transcultural History of Heritage Michael Falser, 2019-12-16 This book unravels the formation of the modern concept of cultural heritage by charting its colonial, postcolonial-nationalist and global trajectories. By bringing to light many unresearched dimensions of the twelfth-century Cambodian temple of Angkor Wat during its modern history, the study argues for a conceptual, connected history that unfolded within the transcultural interstices of European and Asian projects. With more than 1,400 black-and-white and colour illustrations of historic photographs, architectural plans and samples of public media, the monograph discusses the multiple lives of Angkor Wat over a 150-year-long period from the 1860s to the 2010s. Volume 1 (Angkor in France) reconceptualises the Orientalist, French-colonial 'discovery' of the temple in the nineteenth century and brings to light the manifold strategies at play in its physical representations as plaster cast substitutes in museums and as hybrid pavilions in universal and colonial exhibitions in Marseille and Paris from 1867 to 1937. Volume 2 (Angkor in Cambodia) covers, for the first time in this depth, the various on-site restoration efforts inside the 'Archaeological Park of Angkor' from 1907 until 1970, and the temple's gradual canonisation as a symbol of national identity during Cambodia's troublesome decolonisation (1953-89), from independence to Khmer Rouge terror and Vietnamese occupation, and, finally, as a global icon of UNESCO World Heritage since 1992 until today. Congratulations to our author Michael Falser who received the prestigious 2021 ICAS Book Prize in the Ground Breaking Subject Matter category.

Vogel argues that mainstream economics fails to recognize the thermodynamic nature of climate change, thereby missing the point of Northern appropriation of the atmospheric sink. The payment Ecuador seeks for not drilling in the Yasuní is equitable and efficient. Heeding the call of Deirdre (formerly Donald) McCloskey that economics needs humor, Vogel has written a scathing critique of economics-as-usual which also entertains.
