easy sports trivia questions and answers: *The Law of Good People* Yuval Feldman,

2018-06-07 Currently, the dominant enforcement paradigm is based on the idea that states deal with 'bad people' - or those pursuing their own self-interests - with laws that exact a price for misbehavior through sanctions and punishment. At the same time, by contrast, behavioral ethics posits that 'good people' are guided by cognitive processes and biases that enable them to bend the laws within the confines of their conscience. In this illuminating book, Yuval Feldman analyzes these paradigms and provides a broad theoretical and empirical comparison of traditional and non-traditional enforcement mechanisms to advance our understanding of how states can better deal with misdeeds committed by normative citizens blinded by cognitive biases regarding their own ethicality. By bridging the gap between new findings of behavioral ethics and traditional methods used to modify behavior, Feldman proposes a 'law of good people' that should be read by scholars and policymakers around the world.

easy sports trivia questions and answers: Modern Mathematical Statistics with Applications Jay L. Devore, Kenneth N. Berk, Matthew A. Carlton, 2021-04-29 This 3rd edition of Modern Mathematical Statistics with Applications tries to strike a balance between mathematical foundations and statistical practice. The book provides a clear and current exposition of statistical concepts and methodology, including many examples and exercises based on real data gleaned from publicly available sources. Here is a small but representative selection of scenarios for our examples and exercises based on information in recent articles: Use of the "Big Mac index" by the publication The Economist as a humorous way to compare product costs across nations Visualizing how the concentration of lead levels in cartridges varies for each of five brands of e-cigarettes Describing the distribution of grip size among surgeons and how it impacts their ability to use a particular brand of surgical stapler Estimating the true average odometer reading of used Porsche Boxsters listed for sale on www.cars.com Comparing head acceleration after impact when wearing a football helmet with acceleration without a helmet Investigating the relationship between body mass index and foot load while running The main focus of the book is on presenting and illustrating methods of inferential statistics used by investigators in a wide variety of disciplines, from actuarial science all the way to zoology. It begins with a chapter on descriptive statistics that immediately exposes the reader to the analysis of real data. The next six chapters develop the probability material that facilitates the transition from simply describing data to drawing formal conclusions based on inferential methodology. Point estimation, the use of statistical intervals, and hypothesis testing are the topics of the first three inferential chapters. The remainder of the book explores the use of these methods in a variety of more complex settings. This edition includes many new examples and exercises as well as an introduction to the simulation of events and probability distributions. There are more than 1300 exercises in the book, ranging from very straightforward to reasonably challenging. Many sections have been rewritten with the goal of streamlining and providing a more accessible exposition. Output from the most common statistical software packages is included wherever appropriate (a feature absent from virtually all other mathematical statistics textbooks). The authors hope that their enthusiasm for the theory and applicability of statistics to real world problems will encourage students to pursue more training in the discipline.

easy sports trivia questions and answers: Murder Makes Music David Schwinger, 2019-09-19 Tony Capadora was in big trouble. He had been charged with the shooting murder of pop singer/songwriter Filip Beron, and the evidence against Tony appeared to be overwhelming. To start, Tony had publicly accused Filip of taking credit for writing a hit song that Tony had actually composed. Then, the murder weapon had been found buried in Tony's backyard. Finally, Filip had been able to write, in his loose-leaf, the first four letters of Tony's last name, just before he died. Tony was innocent, but he had no alibi and very little hope of avoiding decades in prison. Then, superstar detective Amy Bell was hired to try to clear Tony and find the real killer. With the encouragement and assistance of her husband, Jeremy, Amy slowly but surely uncovered various aspects of Filip's dark side. She identified many people who had reason to wish that Filip were dead. But it would take more than just finding other possible suspects to save Tony from the nearly airtight case against him. A police detective told Amy she was pursuing a ten-million-to-one long shot. But the vivacious and witty Amy was not one to give up, regardless of the odds. Author David Schwinger, when not writing Amy Bell mysteries--there are now eleven--enjoys composing songs, playing pickleball, and traveling the world with his wife, Sherryl. He first met Sherryl when she was his student in a mathematics class he taught at City College of New York. Their secret romance became the inspiration for his first Amy Bell mystery, *The Teacher's Pet Murders*.
