john tucker must die free online: *Hollywood Online* Ian London, 2024-03-07 *Hollywood Online* provides a historical account of motion picture websites from 1993 to 2008 and their marketing function as industrial advertisements for video and other media in the digital age. The *Blair Witch Project* is the most important example of online film promotion in cinema history. Over the last thirty years only a small number of major and independent distributors have converted internet-created buzz into box-office revenues with similar levels of success. Yet readings of how the film's internet campaign broke new ground in the summer of 1999 tend to minimize, overlook or ignore the significance of other online film promotions. Similarly, claims that *Blair* initiated a cycle of imitators have been repeated in film publications and academic studies for more than two decades. This book challenges three major narratives in studies about online film marketing: Hollywood's major studios and independents had no significant relationship to the internet in the 1990s; online film promotions only took off after 1999 because of *Blair*; and Hollywood cashed-in by initiating a cycle of imitators and scaling up corporate activities online. *Hollywood Online* tests these assumptions by exploring internet marketing up to and including the film's success online (Pre-*Blair*, 1993-9), then by examining the period immediately after *Blair* (Post-*Blair*, 2000-8) which broadly coincides with the rise and decline of DVD, as well as the emergence of the social media sites MySpace, Facebook and Twitter.

This book is a comprehensive and accessible history of the depiction of teenagers in American film, from the silent era to the twenty-first century. Timothy Shary explores the development of teenage roles across eras and industrial cycles, such as the juvenile delinquent pictures of the 1950s, the beach movies of the 1960s, the horror films of the 1980s, and the fantasy epics of the 2000s. He considers the varied genres of the teen movie—horror and melodrama, romance and adventure, fantasy and science fiction—and its shifting themes and tropes around sex and gender, childhood and adulthood, rebellion and social order, crime and consumer culture. *Teen Movies* features analyses of films such as *Rebel Without a Cause* (1955), *Splendor in the Grass* (1961), *Carrie* (1976), *The Breakfast Club* (1985), *American Pie* (1999), and the *Twilight* series (2008–2012). Jennifer Todd, Lorenzo Cañas Bottos, Nathalie Rougier, 2013-10-18 The major socio-political changes of the last decades have led to changing ways of being national, changes in the content of national identity if not in the national categories themselves. This comparative social scientific volume takes examples of transitions to democracy (East Europe, Spain) to peace (South Africa, Israel, Northern Ireland) and to territorial decentralization (the United Kingdom, France, Spain), showing in each case how socio-political change and identity change have interlocked. It defines a typology of national identity shift, tracing the changing state forms which provoke national identity shift, and analyzing the process of identity change, its motivations and legitimations. Collecting together a wide range of examples, from South Africa to the Czech Republic from the Basque Country to the Mexican and Irish borders; the book brings together an interdisciplinary group of scholars, from world figures in the study of globalization and social identity to young researchers, to provide a much needed theoretical clarification and empirical evidence of types of national identity shift.
