Comparative Analysis: Journal of Medieval History vs. Other Historical Journals

When compared to other historical journals, the journal of medieval history distinguishes itself through its specialized focus and depth. Whereas broader history publications might cover a wide temporal range or thematic diversity, this journal hones in on the medieval period exclusively, allowing for more nuanced and detailed scholarship.

For example, journals like "Speculum" or "The Medieval Review" also cater to medieval studies but differ in editorial scope and style. "Speculum," published by the Medieval Academy of America, often emphasizes literary and textual analysis, while "The Medieval Review" operates primarily as an open-access platform for book reviews. In contrast, the journal of medieval history balances original research articles with critical book reviews, fostering a dynamic scholarly conversation.

Accessibility and Digital Presence

In the digital age, accessibility to academic resources is paramount. The journal of medieval history has embraced online platforms, offering electronic access to its archives and current issues through academic databases such as JSTOR and ScienceDirect. This digital presence enhances the dissemination of medieval studies scholarship, making it more readily available to institutions and independent researchers alike.

However, access is often behind paywalls, which can limit availability for non-affiliated readers. This is a common challenge among academic journals but one that the journal addresses by occasionally publishing open-access articles or special issues, thereby widening its reach.

Impact on the Field of Medieval Studies

The influence of the journal of medieval history extends beyond publication

metrics. It actively shapes historiographical debates and guides emerging trends in medieval scholarship. By publishing pioneering research, it often sets the agenda for future inquiries and educational curricula.

Notably, the journal has played a role in revising traditional narratives about the Middle Ages. For instance, recent studies featured in the journal challenge the long-held notion of the “Dark Ages” as a period of cultural stagnation, instead highlighting vibrant intellectual and artistic activity. This shift reflects the journal’s openness to reinterpreting medieval history through new evidence and perspectives.

Contributions to Interdisciplinary Research

Modern medieval studies increasingly incorporate interdisciplinary methods, and the journal of medieval history has been at the forefront of this movement. Articles frequently integrate archaeological findings with textual analysis or employ sociological theories to understand medieval societies. This approach enriches historical understanding and connects medieval studies with broader academic fields.

Editorial Standards and Peer Review Process

The journal’s editorial board comprises distinguished scholars from various subfields of medieval history, ensuring a comprehensive and balanced evaluation of submissions. The peer review process is double-blind, maintaining impartiality and academic integrity. This rigorous methodology not only upholds high-quality standards but also encourages constructive feedback, helping authors refine their arguments and methodologies.

Challenges and Opportunities

Like many academic journals, the journal of medieval history faces challenges including maintaining relevance in a rapidly evolving digital landscape and addressing the need for greater diversity in authorship and subject matter. There is an increasing emphasis on including voices from underrepresented regions and exploring non-Western medieval histories, which broadens the journal’s scope and appeal.

On the opportunity front, expanding open-access initiatives and leveraging digital humanities tools present exciting possibilities for future editions. Interactive maps, digital manuscripts, and data visualization could complement traditional articles, enhancing reader engagement and understanding.

Conclusion: The Continuing Importance of the Journal of Medieval History

The journal of medieval history remains an indispensable resource in the field of medieval studies. By consistently publishing high-quality, interdisciplinary research, it supports the ongoing reexamination and enrichment of medieval history scholarship. Its role in fostering academic dialogue, shaping historiographical trends, and promoting global perspectives ensures that the study of the Middle Ages continues to evolve in meaningful ways. As digital technologies and scholarly interests expand, the journal is well-positioned to adapt and maintain its status as a leading publication in medieval history.

journal of medieval history: *The Journal of Medieval Military History* Bernard S. Bachrach, Clifford J. Rogers, Kelly DeVries, 2004-05 Ten papers, on campaigns, biographies, military hardware, fortifications and interpreting medieval records. The second issue of this new undertaking broadens its geographical and practical range, widening its focus to draw in the amateur specialist in addition to military historians: the study of the origins of the crossbow industry in England is a case in point. Other papers include studies of campaigns (Henry II in Wales and Henry of Lancaster in France), articles on weaponry and Spanish fortifications in the Mediterranean, a brief life of the mercenary Armengol VI of Urgel, and case studies of the interpretation of chronicles in reconstructing battles and military action. Taken together, the articles reinforce the centrality of fighting and warfare in the middle ages, adding valuable detail to an understanding of medieval society. Contributors: DAVID S. journal of medieval history: *Journal of Medieval Military History* John France, Kelly DeVries, Clifford J. Rogers, 2018-04-20 The Journal of Medieval Military History continues to consolidate its now assured position as the leading academic vehicle for scholarly publication in the field of medieval warfare. Medieval Warfare The articles here offer a wide range of approaches to medieval warfare. They include traditional studies of strategy (on Baybars) and the logistics of Edward II's wars, as well as cultural history (an examination of chivalry in Guy of Warwick) intellectual history (a broad analysis of strategic theory in the Middle Ages), and social history (on knightly training in arms). The Hundred Years War is studied using cutting-edge methodology (data-driven analysis of skirmishes) and by tackling relatively new areas of inquiry (environmental history). There is also a close reading of Carolingian documents, which sheds new light on armies and warfare in the time of Charles the Great. Contributors: Ronald W. Braasch III, Pierre Galle, Walter Goffart, Carl I. Hammer, John Hosler, Rabei G. Khamisy, Ilana Krug, Danny Lake-Giguère, Brian Price.

journal of medieval history: *The Journal of Medieval Military History* Bernard S. Bachrach, Clifford J. Rogers, Kelly DeVries, 2002-12-05 Warfare is one of the central themes of medieval history. Until now, however, there has been no journal dedicated specifically to this area. The Journal of Medieval Military History, the new annual journal of De Re Militari: The Society for Medieval Military History will remedy this situation by publishing top-quality scholarly articles on topics across the full thematic and chronological ranges of the study of war in the middle ages.

Medieval society was dominated by men who considered themselves more as soldiers than landlords, judges or administrators. More of society's resources went into fortifications than cathedrals; deeds of arms were a topic rivalled in literature only by love; and in many times and places the common people dreaded war far more than famine or plague. War was the greatest force in determining the evolution of medieval governments. Although the study of war, its conduct and its impact, has never been absent from medieval historiography, the past few decades have seen this field rise to new prominence. journal of medieval history: Journal of Medieval Military History Clifford J. Rogers, Kelly DeVries, John France, 2012-09-20 Latest volume in the leading forum for debate on aspects of medieval warfare. The tenth anniversary of the Journal includes pieces by some of the most distinguished scholars of military history, including an analysis of tenth-century Ottonian warfare on the eastern frontier of the Empire by David and Bernard Bachrach. As ever, the contributions cover a wide span both chronologically (from an analysis of the careers of Justinian's generals in the sixth century, to a study of intelligence-gathering in the Guelders War at the start of the sixteenth) and geographically (from Michael Prestwich's transcription of excerpts from the Hagnaby chronicle describing Edward I's wars in Wales, to a detailed treatment of the Ottoman-Hungarian campaigns of 1442). Other papers address the battle of Rio Salado (1340); the nature of chivalric warfare as presented in the contemporary biography of le bon duc Louis de Bourbon (1337-1410); and the military content of the Lay of the Cid. journal of medieval history: Journal of Medieval Military History Clifford J. Rogers, Kelly DeVries, John France, 2007-10-18 Latest volume of original articles on all aspects of warfare in the middle ages. The broad topic of medieval warfare is here explored across the full chronological range of the Middle Ages, using a wide variety of approaches, including literary, prosopographical, technological, and narrative-based analysis. A key feature of the journal is its commitment to fostering debate on the most significant issues in medieval military history; that tradition is continued here with Bernard Bachrach's argument against the idea that early medieval military structures and practices were sharply different from Late Antique ones. Individual battles, the Hattin campaign of 1187 and Byzantine war against Bulgaria in 1254-1256, are the focus of two other chapters; an article by Richard Kaeuper (based on his De Re Militari special lecture at the International Congress of Medieval Studies) emphasizes the value of chansons de geste and other romance material for understanding the mentalité of the martial lay aristocracy of medieval Christendom; and there are further articles on the factors that motivated gentlemen to fight, in both open warfare, and individual combat. Weapons of warfare are not neglected, with chapters casting light on the development of the crossbow and the trebuchet. CONTRIBUTORS: BERNARD S. journal of medieval history: Studying Gender in Medieval Europe Patricia Skinner, 2018-03-07 Building on over a century of scholarly achievements and advances, this book addresses the core problem of how to incorporate gender in the study of the history of medieval Europe, and why it is important to do so. Providing a succinct overview of the field, Patricia Skinner guides us through debates and innovations in the study of gender in medieval history. Noting that the rise of gender studies has happened at a different pace in different regions, this unique text addresses the national variations of approach visible in US and European scholarly traditions. Packed with key authors, alternative approaches and suggestions for engaging with medieval sources, this text is an

essential tool for students and scholars of medieval history at all levels.

journal of medieval history: *Cities and Solidarities* Justin Colson, Arie van Steensel, 2017-01-06 *Cities and Solidarities* charts the ways in which the study of individuals and places can revitalise our understanding of urban communities as dynamic interconnections of solidarities in medieval and early modern Europe. This volume sheds new light on the socio-economic conditions, the formal and informal institutions, and the strategies of individual town dwellers that explain the similarities and differences in the organisation and functioning of urban communities in pre-modern Europe. It considers how communities within cities and towns are constructed and reconstructed, how interactions amongst members of differing groups created social and economic institutions, and how urban communities reflected a sense of social cohesion. In answering these questions, the contributions combine theoretical frameworks with new digital methodologies in order to provoke further discussion into the fundamental nature of urban society in this key period of change. The essays in this collection demonstrate the complexities of urban societies in pre-modern Europe, and will make fascinating reading for students and scholars of medieval and early modern urban history.

journal of medieval history: *What is Medieval History?* John H. Arnold, 2020-10-28 Since its first publication in 2007, John H. Arnold's *What is Medieval History?* has established itself as the leading introduction to the craft of the medieval historian. What is it that medieval historians do? How – and why – do they do it? Arnold discusses the creation of medieval history as a field, the nature of its sources, the intellectual tools used by medievalists, and some key areas of thematic importance from the fall of the Roman Empire to the Reformation. The fascinating case studies include a magical plot against a medieval pope, a fourteenth-century insurrection, and the importance of a kiss exchanged between two tenth-century noblemen. Throughout the book, readers are shown not only what medieval history is, but the cultural and political contexts in which it has been written. This anticipated second edition includes further exploration of the interdisciplinary techniques that can aid medieval historians, such as dialogue with scientists and archaeologists, and addresses some of the challenges – both medieval and modern – of the idea of a 'global middle ages'. *What is Medieval History?* continues to demonstrate why the pursuit of medieval history is important not only to the present, but to the future. It is an invaluable guide for students, teachers, researchers and interested general readers.

journal of medieval history: *Western Warfare In The Age Of The Crusades, 1000-1300* John France, 2020-09-16 In 1095 the First Crusade was launched, establishing a great military endeavour which was a central preoccupation of Europeans until the end of the thirteenth century. In Western

warfare in the age of the Crusades, 1000-1300 John France offers a wide-ranging and challenging survey of war and warfare and its place in the development of European Society, culture and economy in the period of the Crusades. Placing the crusades in a wider context, this book brings together the wealth of recent scholarly research on such issues as knighthood, siege warfare, chivalry and fortifications into an accessible form. Western warfare in the age of the Crusades, 1000-1300 examines the nature of war in the period 1000-1300 and argues that it was primarily shaped by the people who conducted war - the landowners. John France illuminates the role of property concerns in producing the characteristic instruments of war: the castle and the knight. This authoritative study details the way in which war was fought and the reasons for it as well as reflecting on the society which produced the crusades.

journal of medieval history: A Prospering Society John Hare, 2011 This book seeks to explore the changing nature of English society through a case study of countryside and town in southern England during the period from c.1380 to c.1520. It explores the influence of landscape and population on the agriculture of Wiltshire, the regional patterns of arable and pastoral farming, and the growing contrast between the large-scale mixed farming of the chalklands and the family farms of the claylands. It examines the changing situation of the rural tenant population as it reacted to the greater opportunities available in the land-market. During this period, Wiltshire became one of the great cloth-producing counties of England (as reflected in its rising taxable wealth). Such economic expansion generated jobs both within the industry and beyond, stimulating the market for food, services and manufactured goods. Salisbury was one of the greatest cities in the kingdom, and below this was a hierarchy of interesting lesser towns. But such growth generated its own problems: more and more people became dependent on the cloth trade and particularly on exporting cloth; if exports fell, as during the mid-fifteenth-century crisis, they suffered. As scholars are increasingly aware, the later Middle Ages was a period of considerable change, and this study contributes to debates about the nature of both change and continuity at a national level. It will also be of value to local historians interested in one of the most important periods in Wiltshire's history.--BLACKWELL'S.

journal of medieval history: A History of Political Thought Janet Coleman, 2000-06-22 This volume continues the story of European political theorising by focusing on medieval and Renaissance thinkers. It includes extensive discussion of the practices that underpinned medieval political theories and which continued to play crucial roles in the eventual development of early-modern political institutions and debates. The author strikes a balance between trying to understand the philosophical cogency of medieval and Renaissance arguments on the one hand, elucidating why historically-suited medieval and Renaissance thinkers thought the ways they did about politics; and why we often think otherwise.

journal of medieval history: The Art, Science, and Technology of Medieval Travel Robert Odell Bork, Andrea Kann, 2008 This sixth volume in the AVISTA series considers medieval travel from a variety of interdisciplinary perspectives, placing the physical practice of transportation in the larger context of medieval thought about the world and its meaning. The papers included cover vehicle design and logistical management, the practicalities of how travellers oriented themselves, and the symbolism of the landscapes and maps created in the Middle Ages.
